CAVALIER FABRIC OFFICE ARM CHAIR

Warnings:

1. Do not use the chair as a ladder to reach high objects. Standing on the chair is extremely dangerous.
 2. Do not allow children to play on the chair. Spinning or rotating the chair excessively can cause injury.
 3. Dispose of all plastic packaging bags properly. Do not allow children to touch the plastic bags, as they may pose a suffocation hazard.
 4. Do not lean too far back in the chair so that the wheels or legs lift off the floor. This can cause the chair to slip, damage the structure, or loosen key components, potentially causing the chair to fall apart.
 5. Never place all your weight on the very front edge of the chair. Doing so may cause the chair to tip forward. Use a chair with a forward tilt mechanism if your task requires a forward-leaning posture.
 6. Do not leave electrical appliances on upholstered chairs. Overheating may cause a fire. Be cautious when smoking or handling lit materials near upholstered chairs.
 7. Do not overuse or neglect your chair. Inspect and maintain it at least every 60 days.
-

Do's:

1. Always follow the assembly instructions carefully. Ensure all parts are installed in the correct order to keep the chair secure and stable.
2. Pay close attention to make sure all casters or wheels are fully inserted into the base.
3. Check all parts regularly—at least once a month—to ensure everything remains tight and stable.
4. Always keep the base of the chair flat and fully supported on the floor.
5. Make sure the tension control is properly adjusted to ensure smooth and controlled reclining motion.
