# 01 Product Overview

---

Thank you for purchasing the HOTO Precision Screwdriver Set. Please read this manual carefully before use, and retain it for future reference.

## 02 How to Use

---

### Opening/Closing the Cover

- Turn the storage box cover upward to the natural open position (the maximum open angle is 115°), please do not turn it forcibly.
- Turn the storage box cover downward to zero degree, and the storage box will be closed.

### Bit Storage

- Bits are stored in the base magnetically.
- Put the bit in the bit slot after use, it will be attached automatically.

### How to Use the Screwdriver

- The bit can be inserted into the screwdriver handle directly for use.
- When the bit is inserted into the screwdriver handle, magnetic force can be generated, and most screws can be attached by the magnetic force.

## Screwdriver Handle Storage

- Insert the tip of the precision screwdriver into the circular hole and press it for storage.

Illustrations of the product, accessories, and user interface in the user manual are for reference purposes only. Due to product updates and upgrades, the actual product may be slightly different from the schematic. Please refer to the actual product.

## 03 Precautions

---

- A part of the finger may be clipped if the storage box cover is being turned upward too fast.
- Please make sure the power of the live equipment has been cut off before using this product.
- This product is not a toy and should not be used by children. The screwdriver should only be operated by persons 16 years of age or older.

⚠ Be careful to prevent the hands from being clipped by this area during opening/closing.
