For more positioning options go to last page

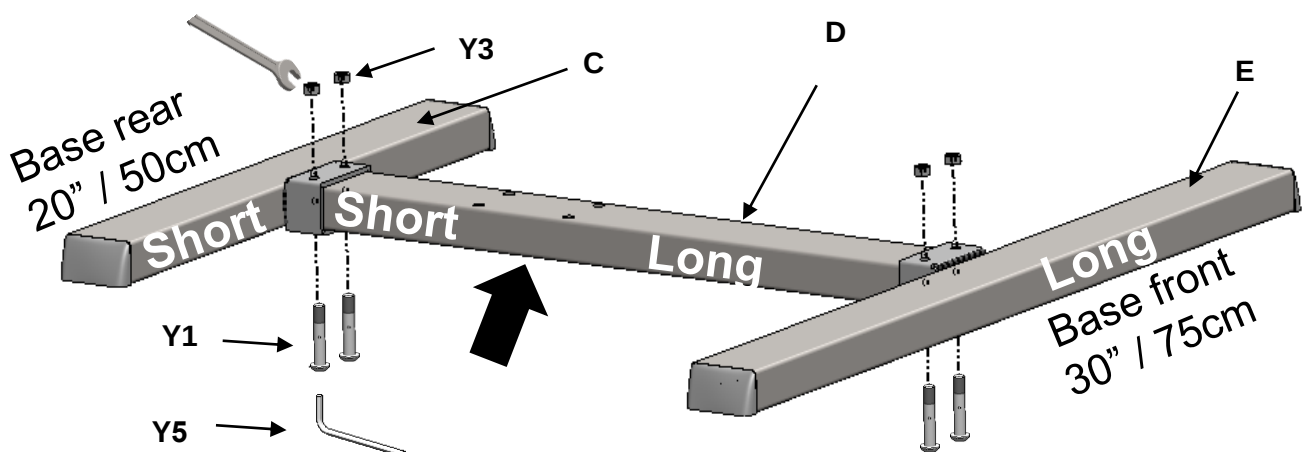

Connect the TV plate with the adaptors to the TV in all 4 connection holes.

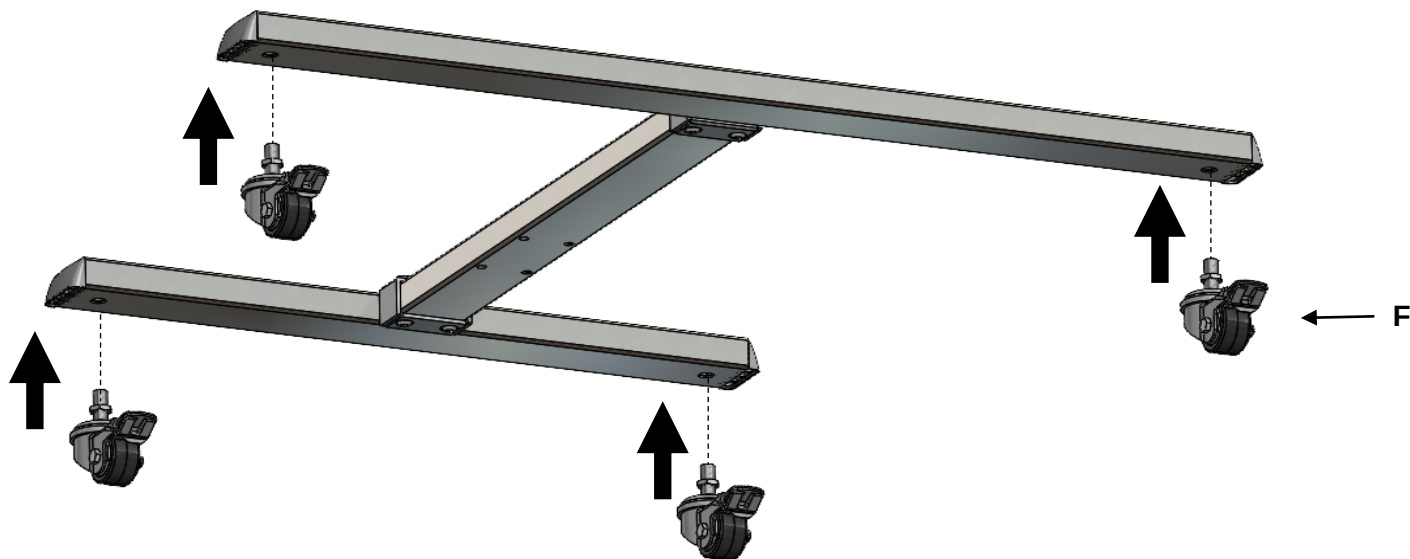

2

Long – Long: Connect the Base front (E) to the longer end of the Base center (D).

Short – Short: Connect the Base rear (C) to the shorter end of the Base center (D).

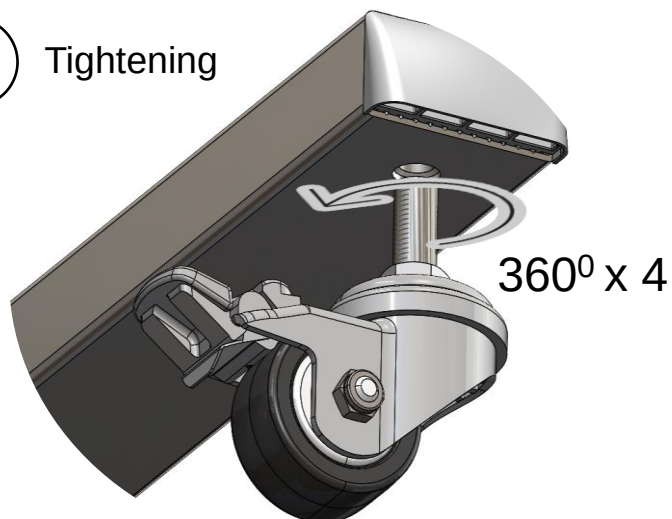

3 Connect the wheels. Make sure they are locked .

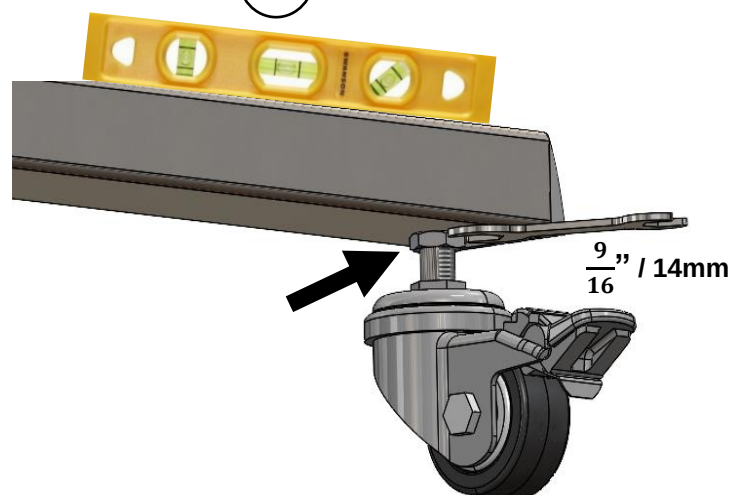

Tighten each screw as needed until the base is balanced.

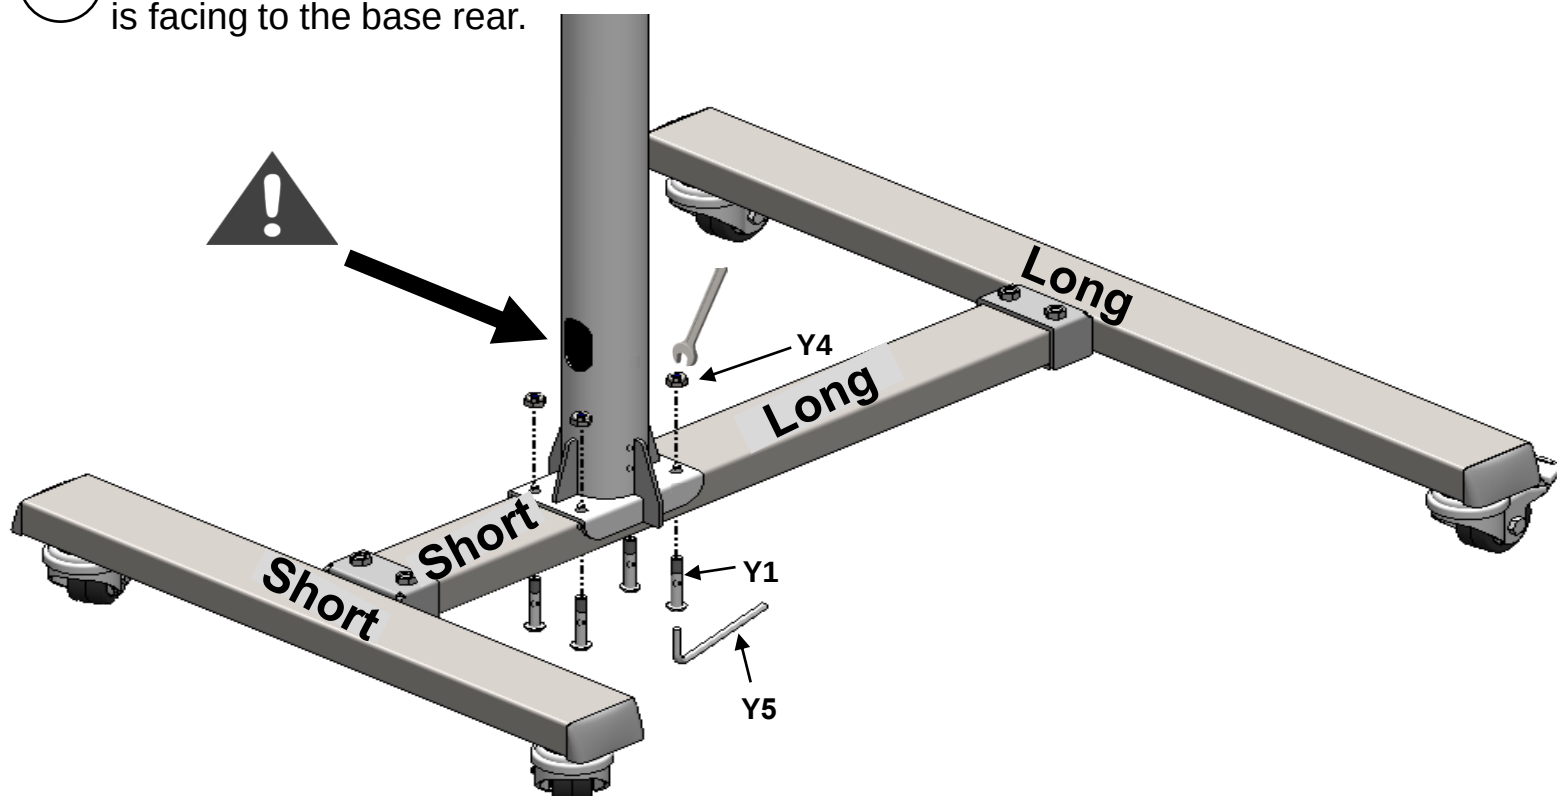

A Tightening

B Leveling

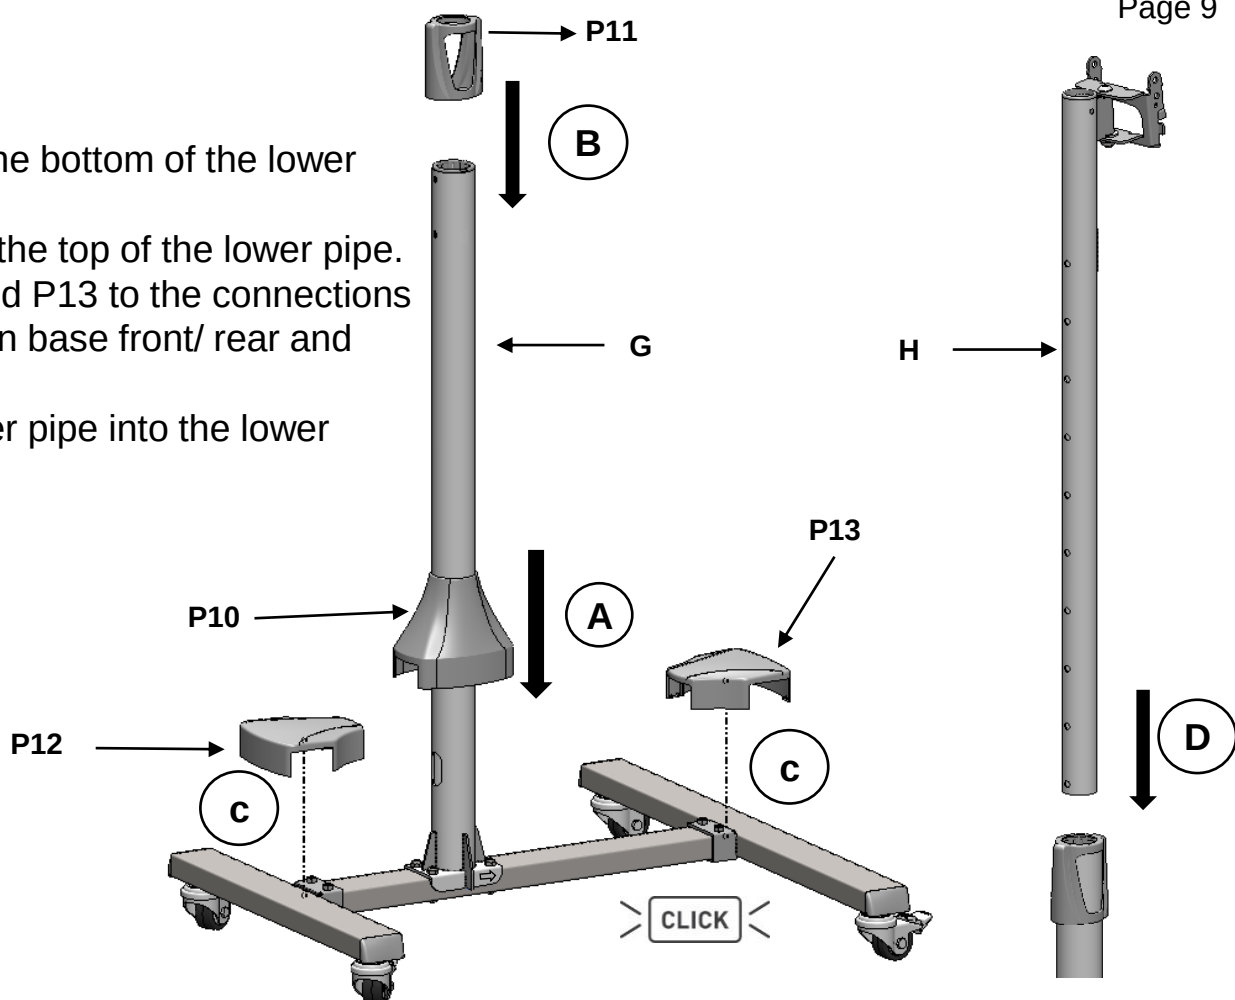

4 Connect the lower pipe (G) to the base center (D). Make sure that the hole for cables is facing to the base rear.

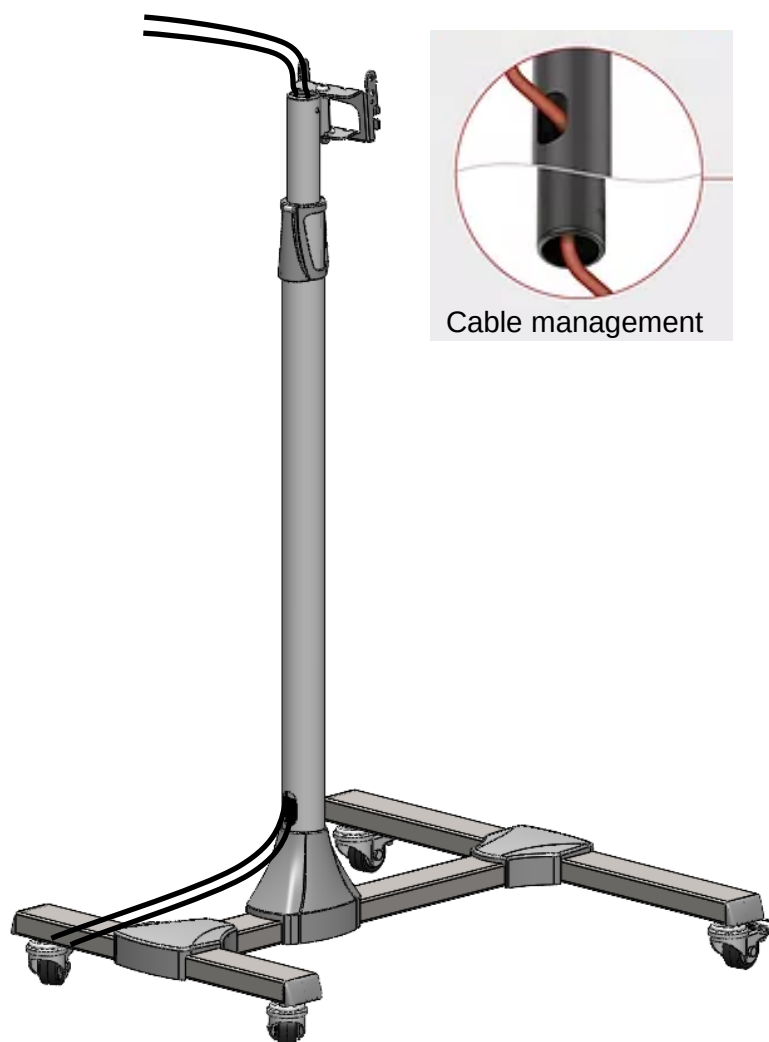

5

1. Slide P10 to the bottom of the lower pipe.
2. Place P11 on the top of the lower pipe.
3. Attach P12 and P13 to the connections points between base front/ rear and base center.
4. Slide the upper pipe into the lower pipe.

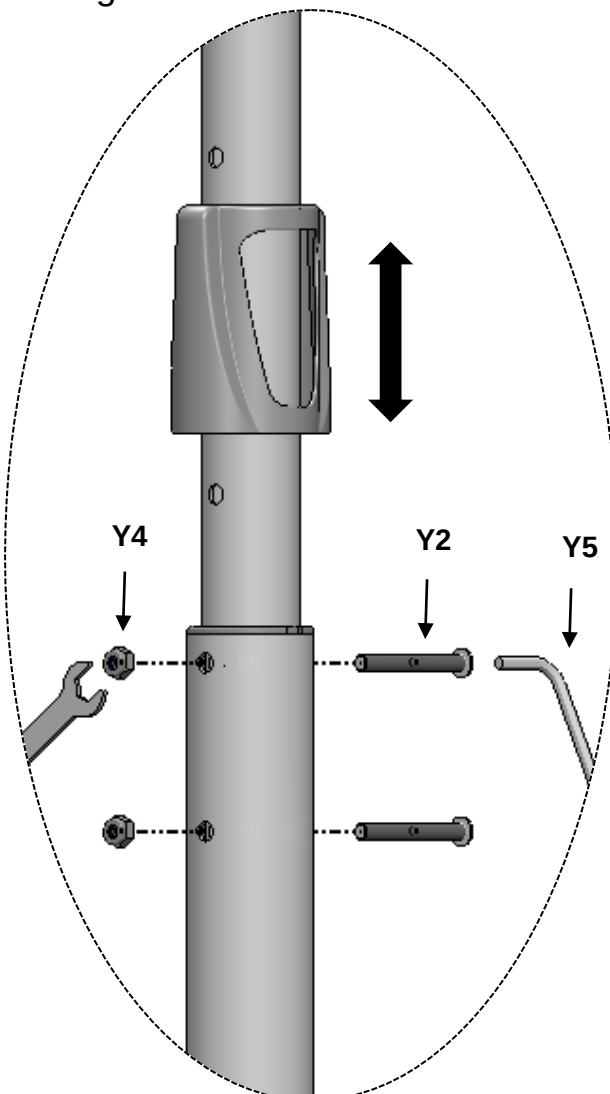

6

A Pass the cables through the pipes.

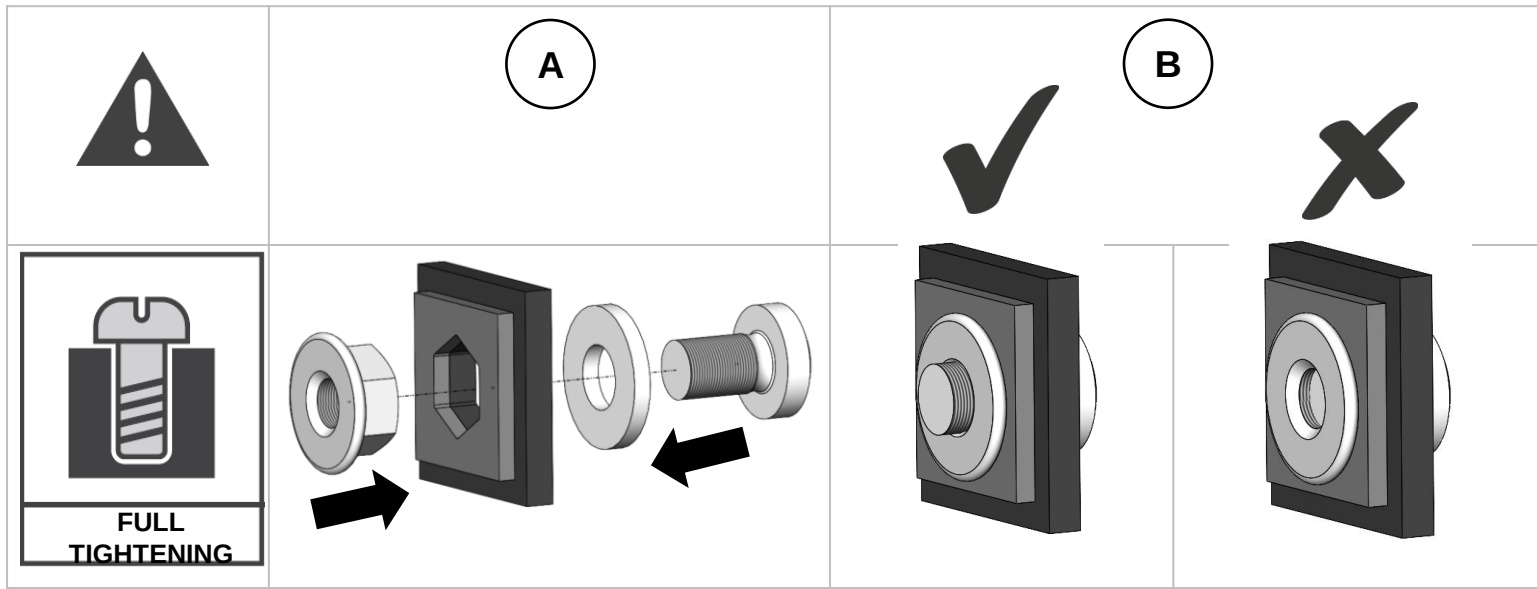

B

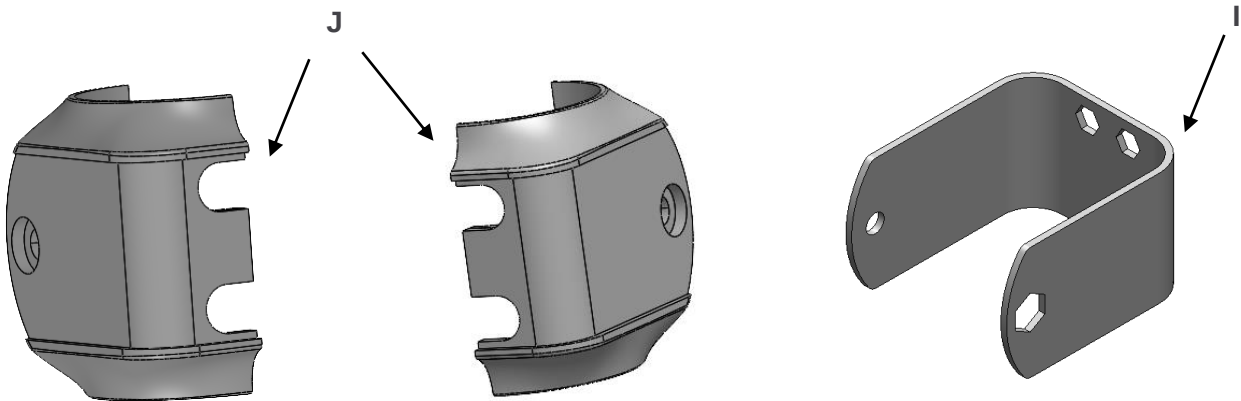

Adjust the stand to the desired height and screw in the screws.

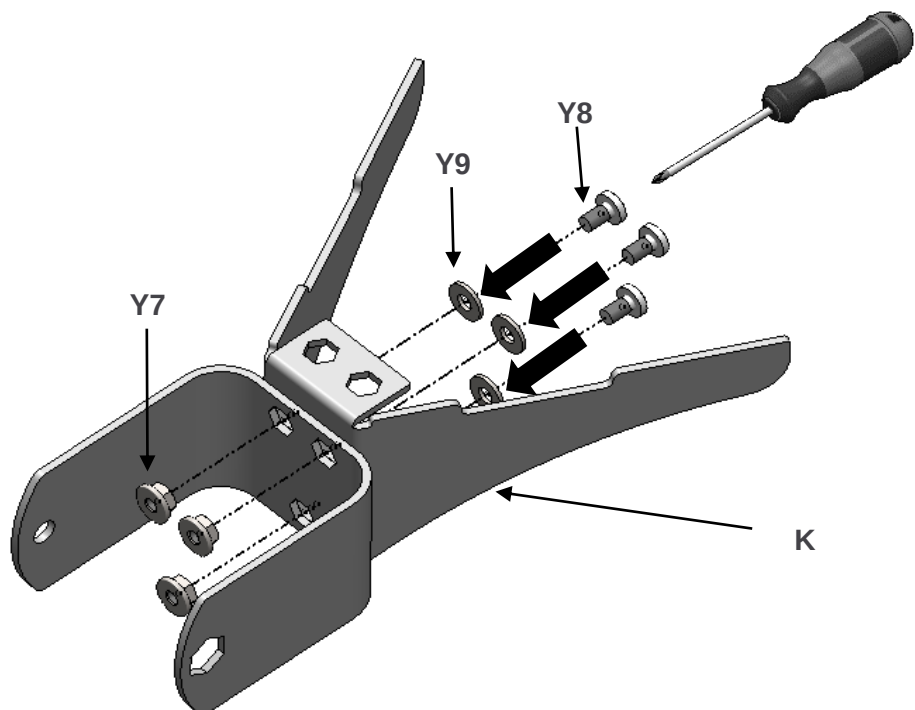

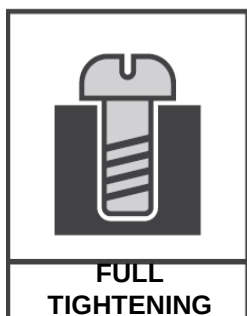

Full Tightening — Whenever the full tightening icon is displayed, make sure to place a nut inside the hexagonal slot and that the endpoint of the screw crosses the edge of the nut.

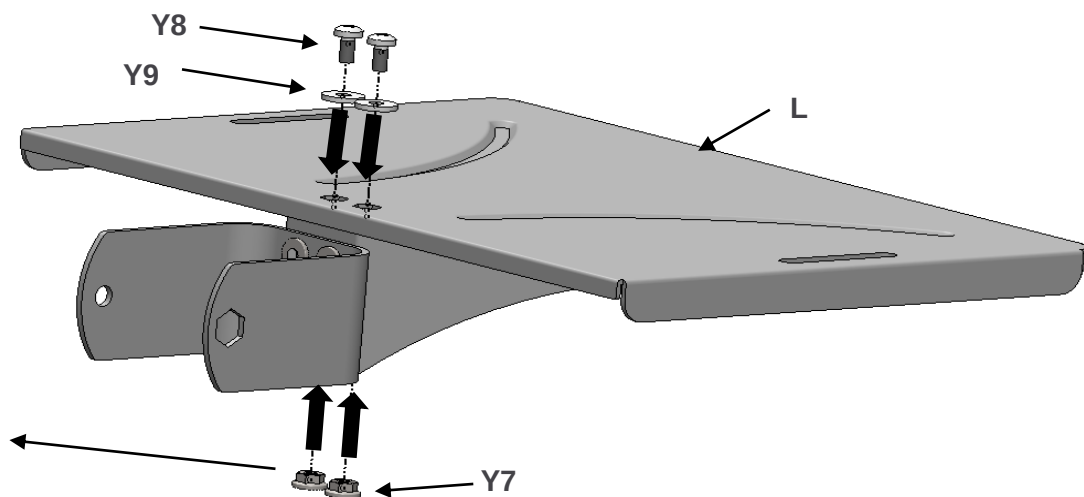

- 7** Remove plastic parts (J) from the U-shaped part (I).

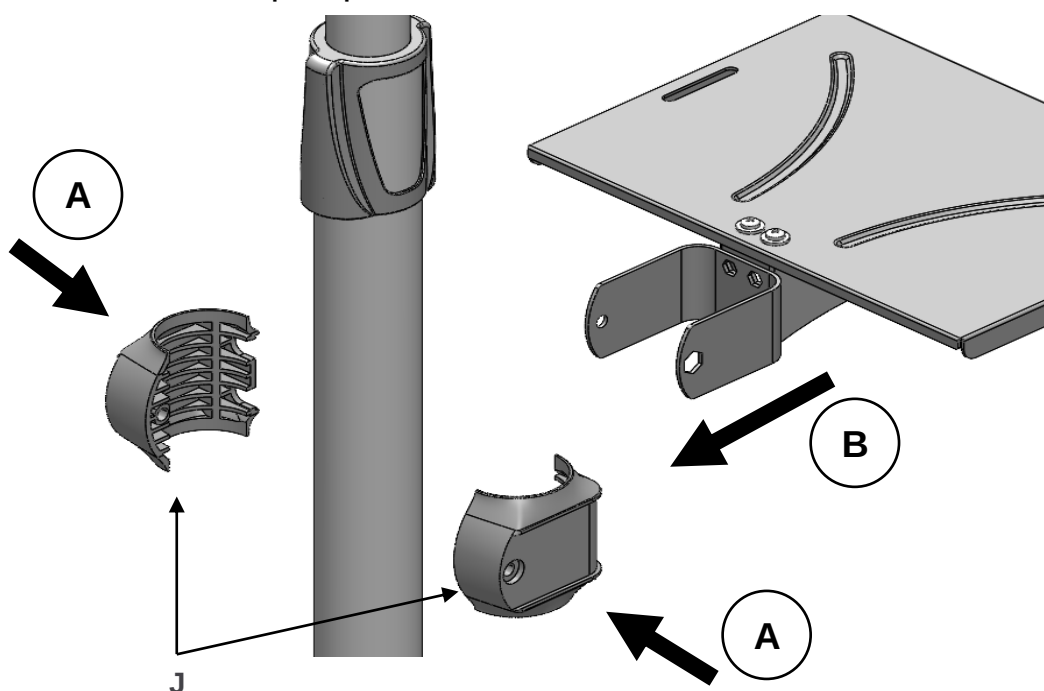

- 8** Connect the base (K) to the U-shaped part (I)

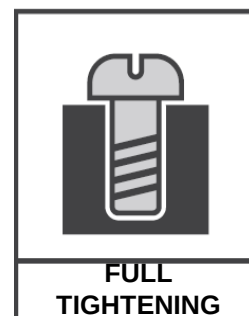

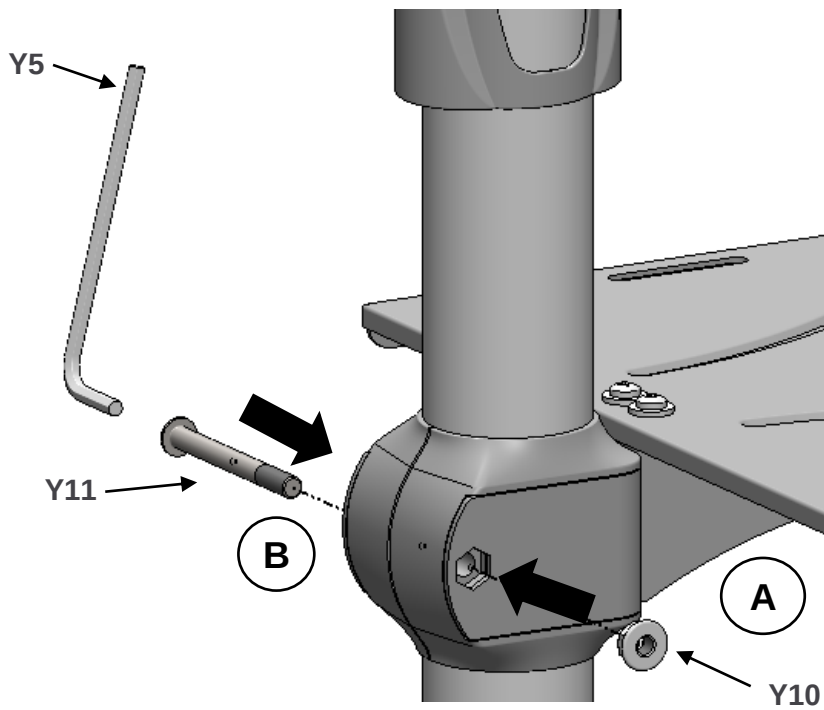

- 10
1. Assemble the plastic parts (J) on the lower pipe (G).
 2. Attach the U-shaped part on it.

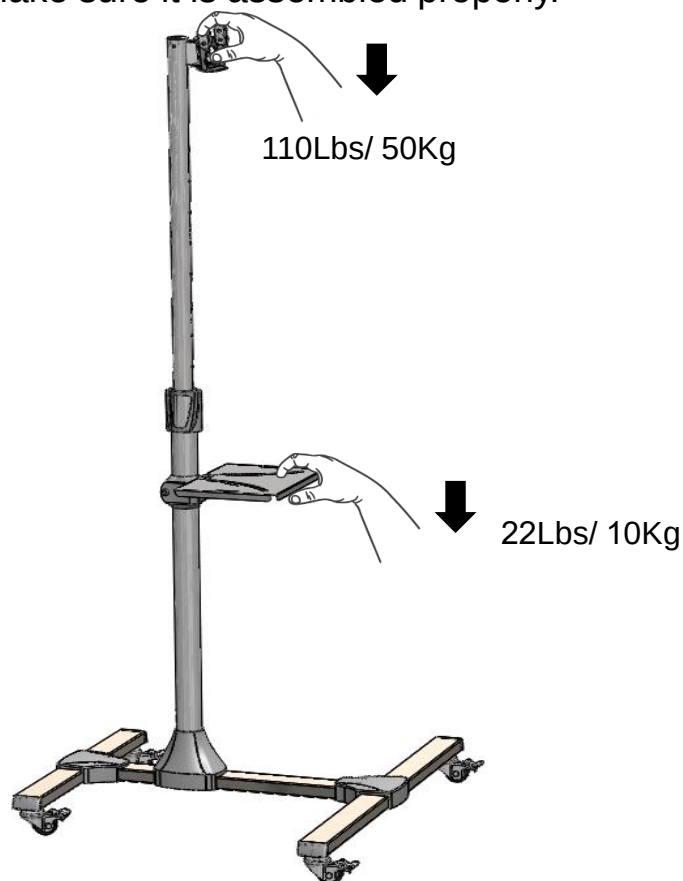

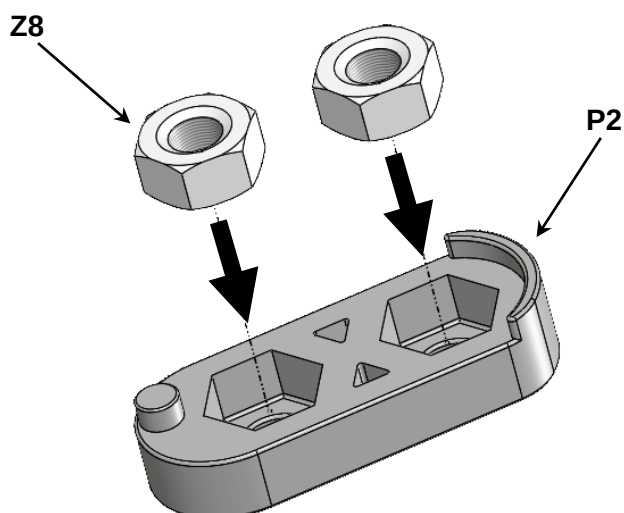

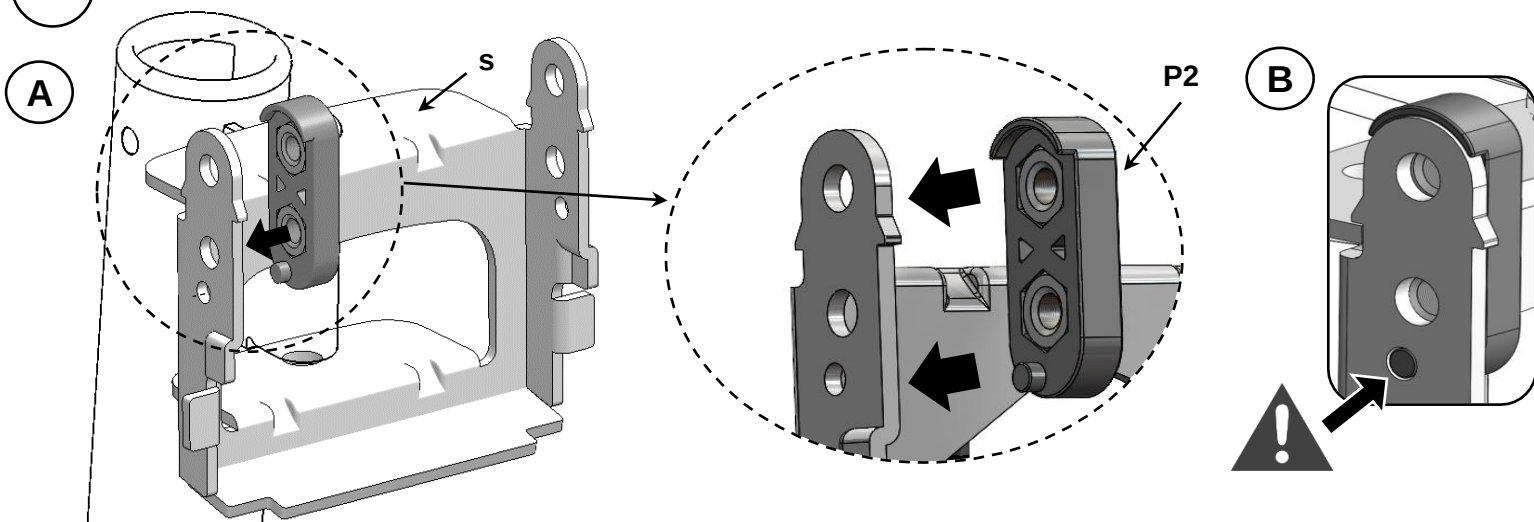

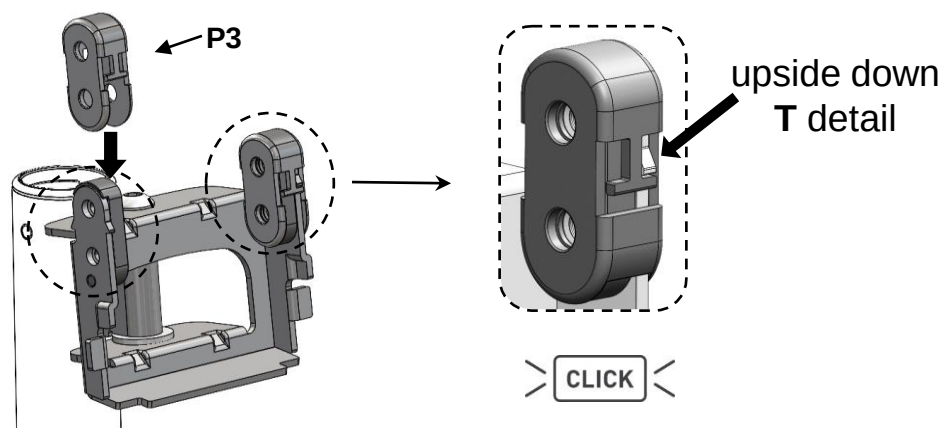

Set the shelf height.

Place the nut inside the hexagonal slot and screw in the screw.

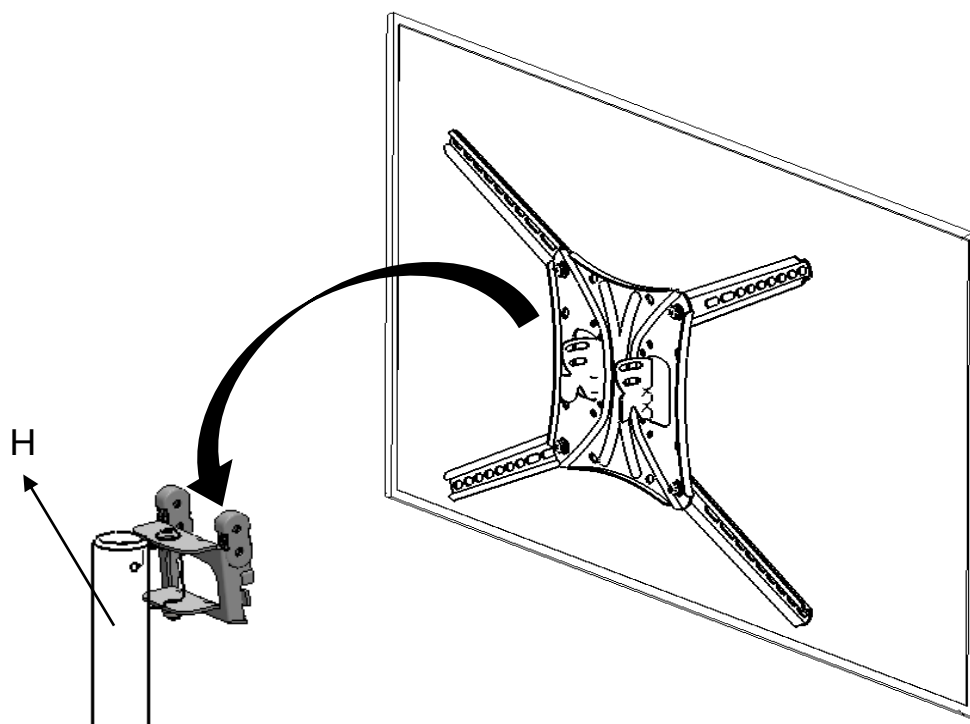

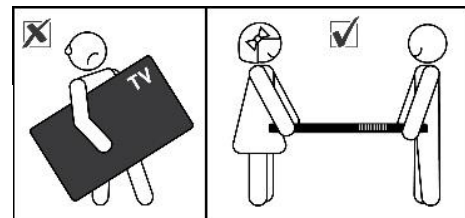

12 Weight test

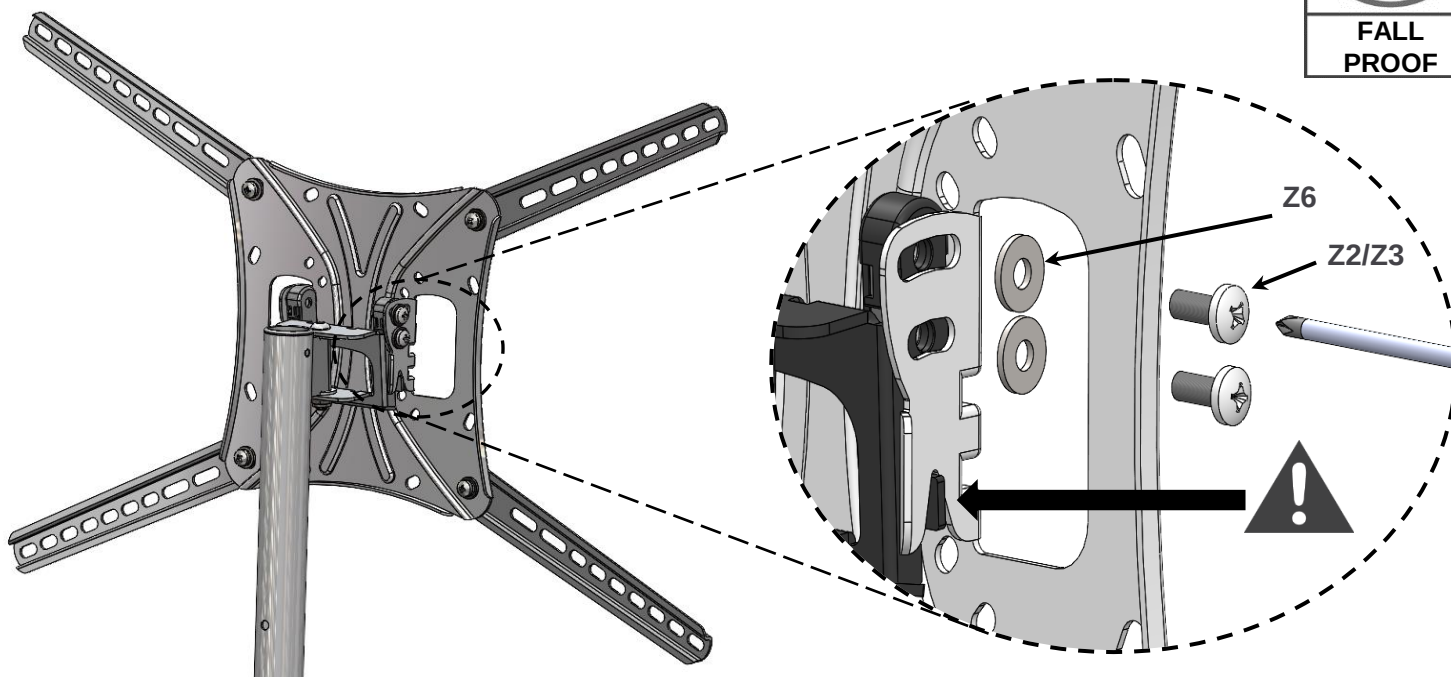

Apply force on the on the product and make sure it is assembled properly.

**13** Place two nuts (Z8) in each of the two nut-housings (P2).**14** Attach the nut-housings (P2) on to part S. Make sure that the tab is inserted into the slot.**15** Push parts P3 down on the nut-housings (P2). The upside down "T" must pass the protruding tooth (shown below).

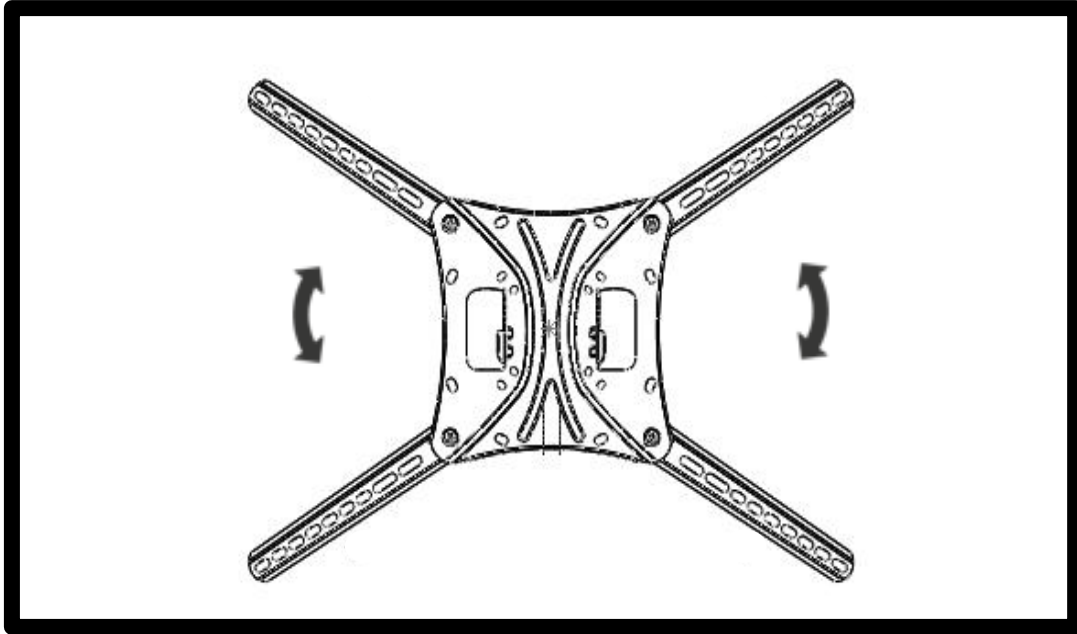

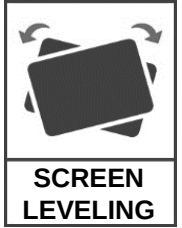

16 Connect the TV plate with the TV to the upper pipe (H).

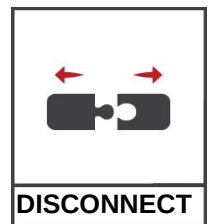

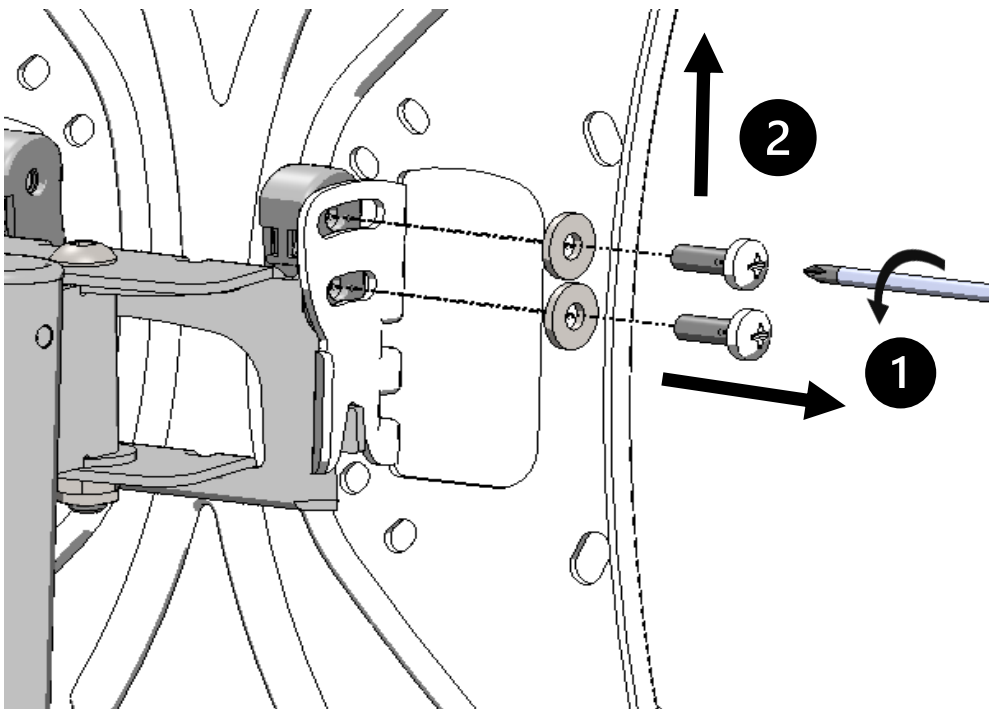

17 Insert and tighten the screws on both sides to create friction for the tilt mechanism. Adjust the tilt angle of the TV carefully

18 Level the TV.

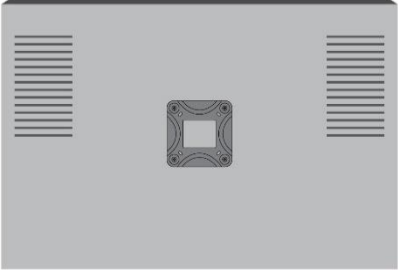

Disconnect the TV, remove the screws and lift the TV.
