1

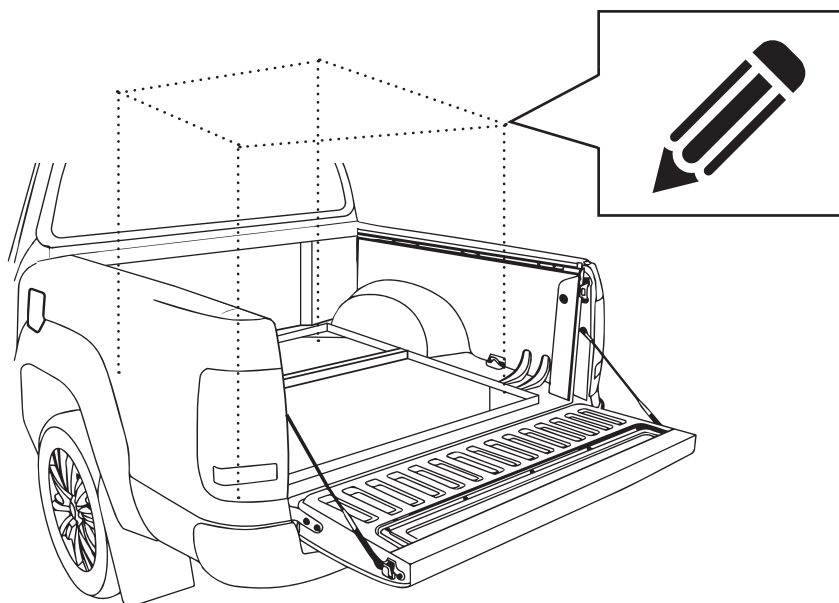

Ensure there is a clearance gap of between 5-10mm from the handle to the tailgate.

2

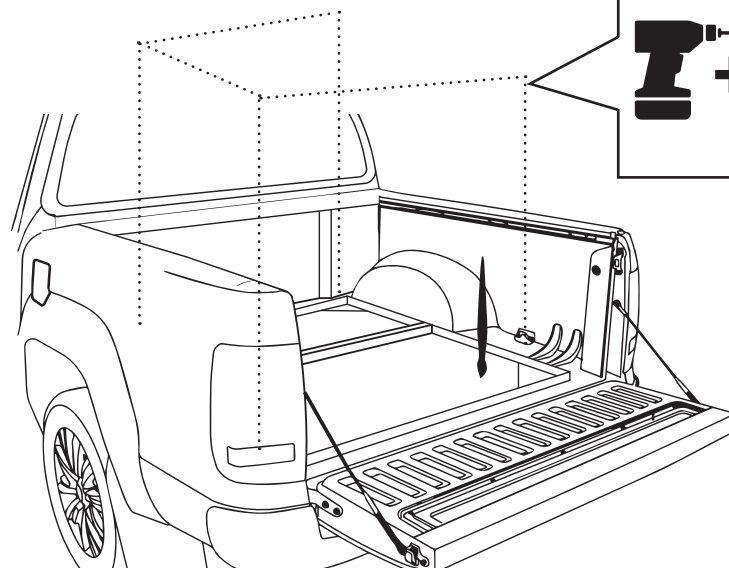

Centre the frame in the middle of the tub allowing even gaps between wheel arches.

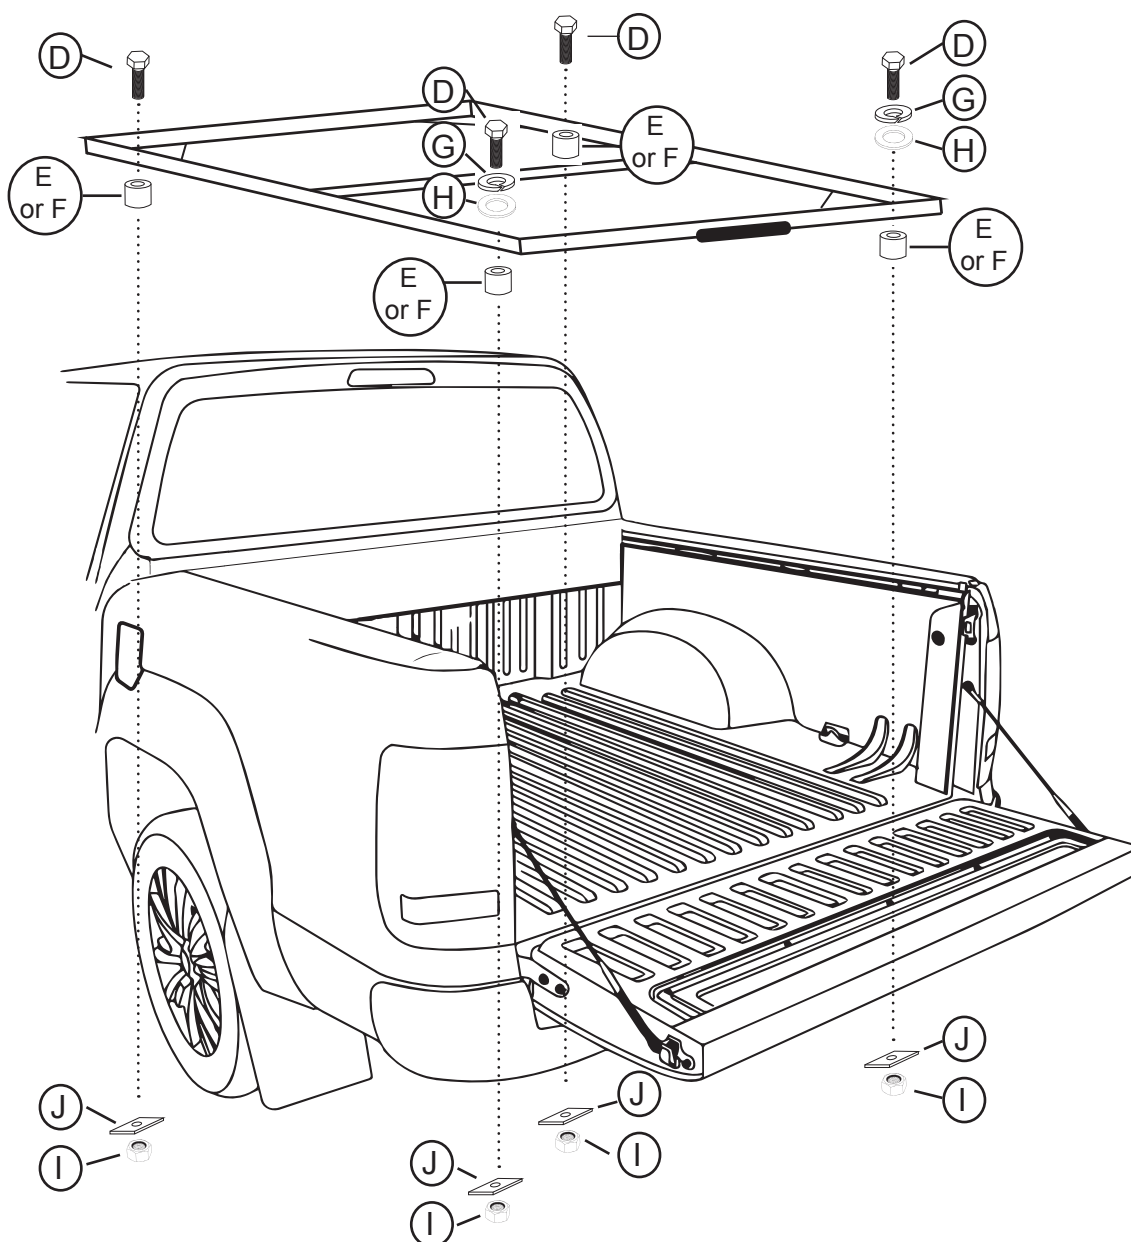

3

Mark and pick relevant drill holes.

4

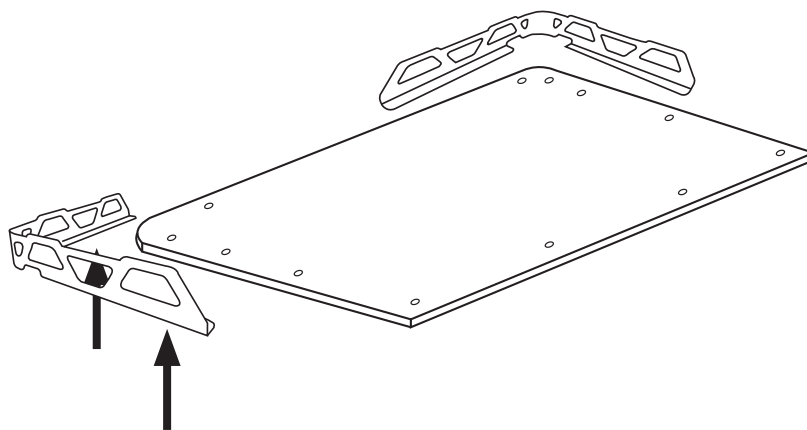

CAUTION: Before drilling, check to ensure no important or hazardous items are positioned beneath the drill points such as spare tyre, fuel lines/tank or wiring.

5

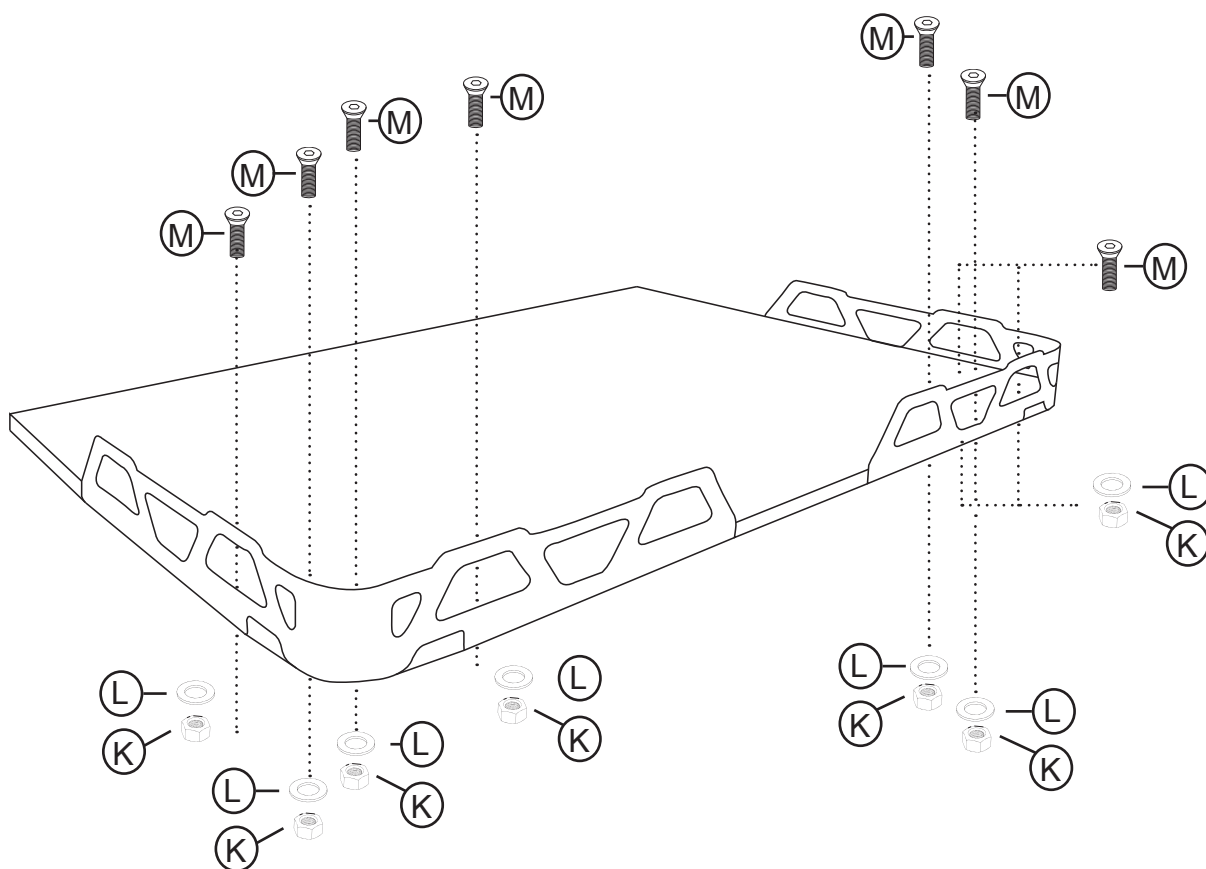

Ensure the spacers are placed underneath the frame. Pick relevant spacer according to fitting.

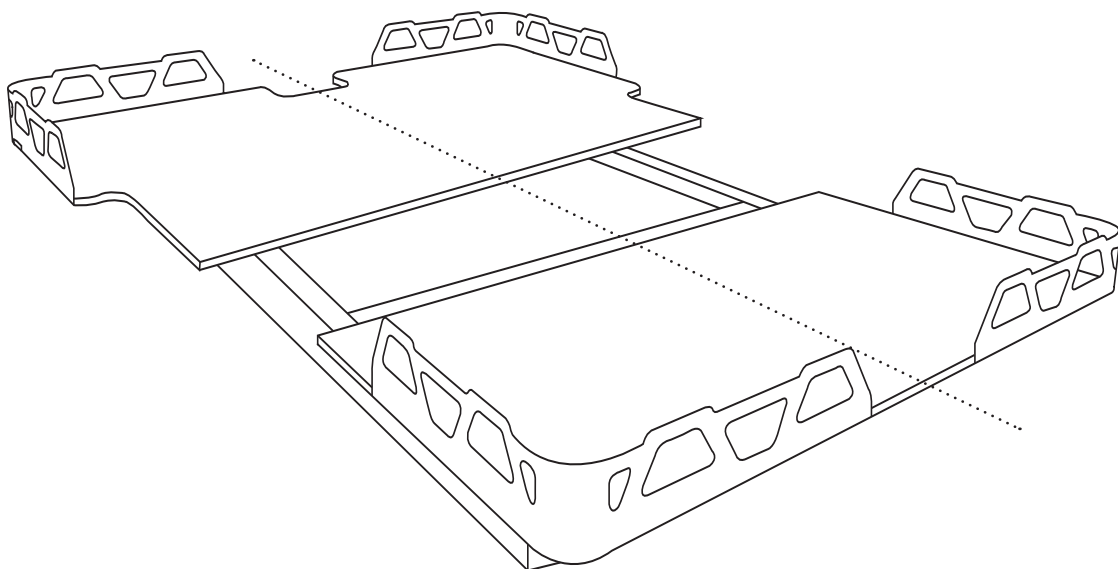

6

Ensure side-rails are placed underneath the platform.

*REPEAT THIS PROCESS FOR THE FRONT PLATFORM.

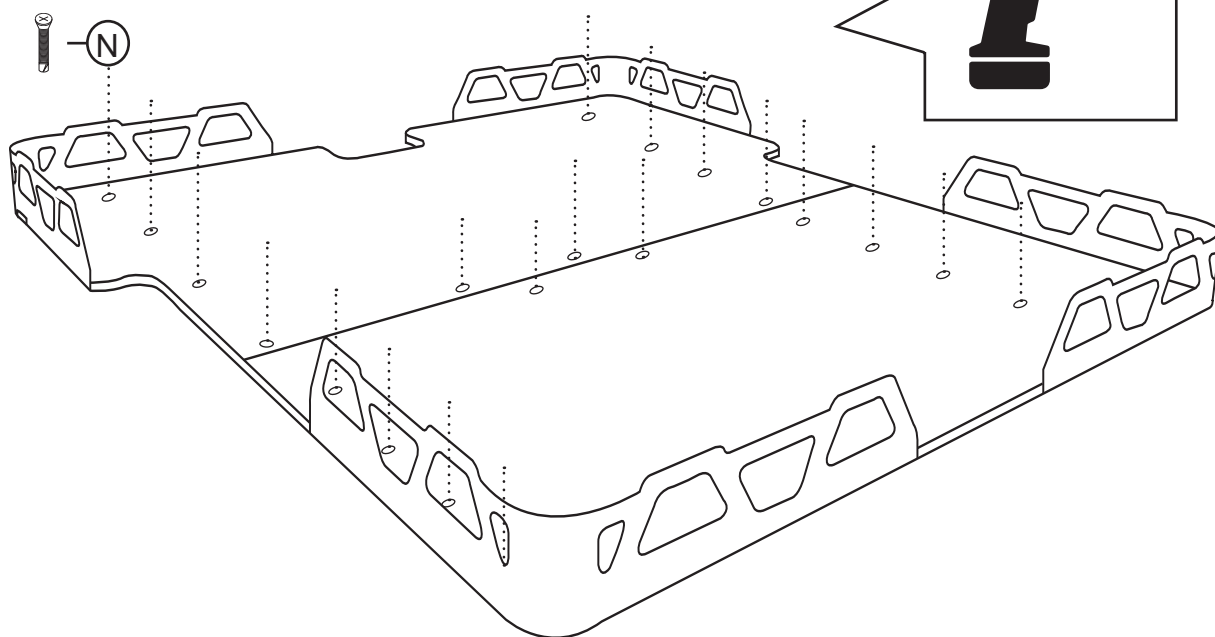

7

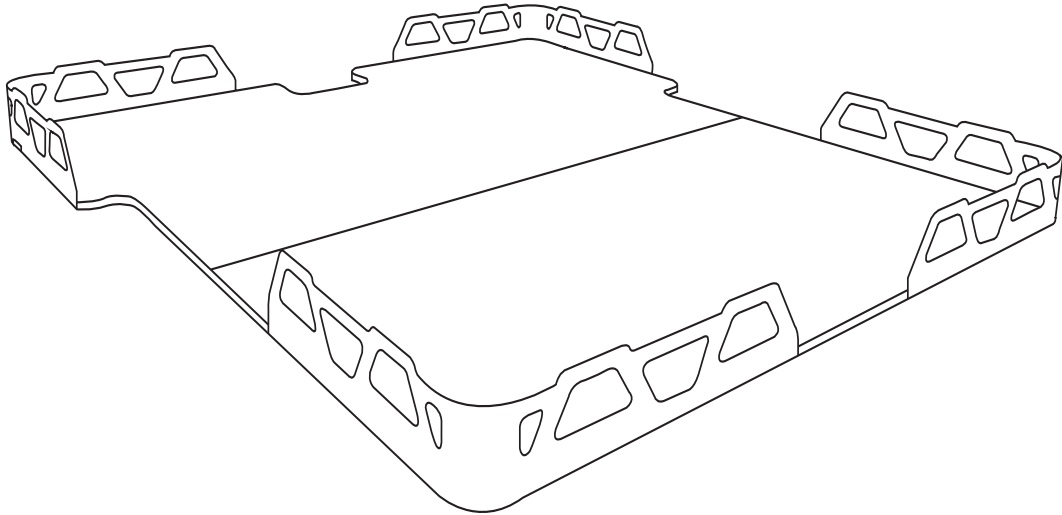

8

Centre the both platforms on the frame and ensure all gaps are even.

* Add pilot holes to frame before fastening screws.

9

WARNINGS!
