INTELLIGENT TECHNOLOGY DOESN’T HAVE TO BE VISIBLE

OUR INNOVATION

ACTILIGHT: Zinc oxide coating combined with UV light for an antibacterial effect that breaks down waste.

AERIAL SHOWER: An aerated water for the shower.

WASHLET: An internally adjustable wand system with self-cleaning function.

AERIAL PULSE: An aerated water with a pulsating function.

E-WATER+: Electrolyzed antibacterial water that breaks down waste.

WATER PILLAR: Light jet voluminously stream of water.

WATER-SAVING: Technologies that save water.

GYROSTREAM: Shower jets with rotating and pulsating functions.

TORNOADO FLUSH: Revolutionary trio-jet flushing system.

CASCADE FLOW: Waterfall-like shower function that warms the entire body.

RIMLESS DESIGN: Seamless easy-clean bowl design.

ECOCAP: Faster aerated water stream.

CEFIONTECT: Special hygroscopic glaze for a smooth ceramic surface.

SELF POWER: Sensor-activated faucet generates its own electricity.

AUTO FUNCTIONS: Sensor-controlled technologies activated by human movement.

SMA: Maintains a constant water temperature despite fluctuating water supply temperatures and pressure levels.

HYDROTTECT: Intelligent coating for indoor and outdoor surfaces using photocatalytic technology.

LUMINIST: Transparent epoxy resin material.
ewater+ is an antibacterial liquid that prevents waste particles from accumulating and staining the toilet bowl. It is automatically sprayed onto the toilet bowl after flushing. It eliminates 99.9% of bacteria and sterilises the bidet nozzle after every use.

**THE PURIFICATION CYCLE**

**BEFORE**
- Pre-mist (water) is sprayed into the bowl

**DURING**
- Nozzle is cleaned with water
- Nozzle and bowl is cleaned with ewater+

**AFTER**
- After 8 hours of non-use, ewater+ is automatically sprayed

**INTERIM**
- After 8 hours of non-use, ewater+ is automatically sprayed

**MECHANISM**

- Tap water is electrolysed as it travels through the toilet.

When naturally occurring chloride ions in tap water are electrolysed, they turn into hypochlorous acid, the active ingredient of ewater+. Hypochlorous acid is capable of instantly sterilising a dirty surface.

ewater+ converts back into regular water after two hours, making it an Earth-friendly alternative to harsh household cleaning agents.
Symbolising TOTO's primitive top-notch creation that never fails to surpass the norm, the Washlet surprised the world by making its first appearance starting from Japan as early as 1980. Since then, we never looked back; so will you once you start using it.

With further improvisation and invention of more comfort functions such as self-sanitisation and deodoriser, what we see today is revolution in itself.

CUSTOMISED SPRAY PATTERNS

- **Rear**
  - A powerful flow of water

- **Front**
  - A spotted water flow

- **Rear-soft**
  - A soft and gentle water flow

- **Wide-front**
  - A light flow covering a wider area

WONDERWAVE CLEANSING

This technique sprays water droplets in rapid succession to achieve powerful cleansing while only using small amount of water. This technology strikes a balance between eco-friendliness and comfort by supplying an alternate motion of large and small water droplets to provide a sense of abundance yet sufficient strength.

OTHER WASHLET FEATURES

- Oscillating Spray Nozzle
- Air Purifier (Deodoriser)
- Air Dryer
- Seat Warmer
- Easy remove for cleaning
- Auto open and close
TOTO developed all the toilet technologies used in its products and has also continued to improve them consistently. These technologies mark the standards in every TOTO toilet, ensuring the greatest possible hygiene as demonstrated in expert reports and studies.

### TOILET TECHNOLOGIES

- **Tornado Flush**
  - **Description:** Tornado Flush is an integral feature of TOTO toilets. It reimagines the way a toilet flushes. Instead of a conventional flush that pours down from the rim, Tornado Flush projects three high-pressure water jets that generate a tornado-like vortex of water, forcing waste off the bowl’s surface. It is quiet yet at the same time water efficient.

  - **Advantages:**
    - A more quiet flush.
    - Cleans the entire bowl more thoroughly hence reducing the need for chemical cleansers.

- **Rimless Design**
  - **Description:** The Rimless Design eliminates areas where dirt and bacteria tend to settle. With less crevices than a conventional bowl, all areas of the bowl can be easily reached with minimal cleansing agents, making it friendlier to you as well as the environment.

  - **Advantages:**
    - Easier to clean.
    - Minimises the need for toilet cleaner.

- **Cefiontect**
  - **Description:** Cefiontect is a special glaze applied to TOTO ceramic products that makes the surface ultra-smooth even at microscopic levels so that waste particles easily slide off. This prevents the formation of ridges caused by wear and tear that will create breeding spaces for bacteria. This Cefiontect glaze is applied before firing hence is extremely resilient and long lasting.

  - **Advantages:**
    - Easier to clean.
    - Dirt resistant.
    - Minimises the amount of toilet cleaner required.
