Neion *Integrated smarts by Arcisan*

The Neion intelligent toilet, by Arcisan, was created by combining the aesthetics of a rimless toilet pan with the cleaning functions of bidets; to bring you the best looking intelligent toilet on the market. Its success lies in the familiar look and feel of the pan, its compact size (no bulky electronic control units) and streamlined design.

It may be compact in size but is not short on features! With a soft-close wrap seat, it also hosts a 2-user memory, so you can easily program your specific requirements. The Neion is fully customisable with:

- gender specific functions
- pressure increase / decrease
- LED night light
- massage function
- air temperature controls
- deodoriser (using a diatomaceous mud filter)
- drying functions
- water temperature controls

Many of these functions are accessible through the easy to use remote control. There is also a quick access option for the basic functions by simply turning the control knob on the side of the seat back and forth.

The Neion intelligent toilet has been engineered to be easy to clean. The ceramic surface in the bowl has a special glaze incorporating nano-technology. Called 'CleanTect', this special glaze enables your pan stay cleaner for longer by giving the ceramic a smoother surface at a microscopic level. In addition, the nozzle is self-cleaning before and after every use plus the tank runs a self cleaning mode if left in standby for an extended period of time.

Ease of installation has also been considered with the Neion, as it does not require the extra valves installed in the wall and the added expenses associated with installing and maintaining the valves.

Neion intelligent toilets are available in two different styles; a round and square design and are available as a wall-faced pan and wall-hung pan so there is an option to suit any style of home.
