CLEARWATER BATHS AND BASINS

COMPANY PROFILE

Since 1956 Abey Australia has held the front for bringing cutting-edge tapware and sinkware designs to Australia. For almost sixty years, this quality supplier continues to flourish from strength to strength.

Gareth Ashton Abey's sister brand combines the qualities of Abey's core in a modern kitchen/bathroom range. With a style and a budget to suit every consumer Abey has catered for everyone's needs.

ABEY DISTRIBUTION

Abey exclusively distribute Clearwater who use a range of international designers to create beautiful solid surface baths and basins. Abey are always searching for beauty in product design, however at the core of every product we sell there is an undeniable quality that meets the needs of both customer and end user.

CLEARSTONE MATERIAL

DOLIMITIC MARBLE

ClearStone is a new material made from Dolomitic Marble. The marble creates a tough and hard wearing surface ideally suited for modern demands of exceptional performance and endurance. Aluminium compounds are added to make ClearStone not only lighter than traditional volcanic stone, but gives ClearStone its fire retardant and smoke suppressant qualities. A modern material both in performance and safety.

ClearStone benefits from the superior thermal performance of the Dolomitic composite, allowing the bath water to remain warmer longer. This also reduces problems with condensation in the bathroom.

ClearStone has a moulded high gloss polyester polymer coating. The coating is moulded onto the bath surface (not painted), thus ensure long lasting performance both in appearance, colour stability and resistance to scratching or cracking.

HIGHGLOSS

The moulded polyester polymer coating creates a high gloss finish ideal for matching to sanitary wares and tiles.

Being a moulded coating, rather than a sprayed or painted surface, ClearStone high gloss baths have the highest resistance to accidental damage, thermal degradation or hydrolysis.

The coating is exceptionally hard wearing and resistant to scratching.

- Made from Dolomitic Marble for a tough and hardwearing surface
- 10 Year Guarantee
- One piece solid surface bath / basin
- High gloss surface derived from the moulded polyester polymer coating
- Brilliant white colour
- Softer, more elegant curves and details
- Designed with thin ledges to ensure maximum bathing space – a 1600mm ClearStone bath has the equivalent bath space as a 1700mm standard bath
- High resistance to ultraviolet light degradation
- High strength to weight ratio (all baths less than 100 kg's)
- Available in both modern and classic designs with a variety of sizes
- Flat to floor bath options for easier access (rim less than 500mm from floor)
- Under bath plumbing cavity options for easy installation and maintenance
- 11 bath models. 5 matching basins

SPACE SAVING BATHS

Regular bath

Clearstone bath

Clearstone baths are made from stone so they do not need a ledge around the bath. This means that the internal bathing space of a natural stone bath is far more spacious than that of the same sized acrylic or steel bath. You can fit an 180 x 80cm bath into a 170 x 70cm bath!!

DEEPER BATHS

Regular bath

Clearstone bath

Clearstone baths are made so that they sit on the floor -and don't require feet under the bath, as do acrylic and steel baths. This means that natural stone baths are around 12cm deeper than regular baths - with no increase in the overall height of the bath. This makes for a really relaxing deep bath!

EASY INSTALLATION

Every natural stone bath comes with a simple installation guide. All baths are supplied in individual boxes – so they reach your home in perfect condition. In addition we supply each bath in a carrier bag – so that it is easy for installers to move the bath to the proposed location in your bathroom.

HANDMADE

Each clearstone bath is hand made by three people. It takes over ten hours to hand polish every bath.

TWO DIFFERENT INSTALLATIONS

The Clearwater range includes a selection of full to floor baths – this allows the top bath rim to have a floor to rim height of less than 500mm. These baths are much easier for getting in and out, and due to their low profile occupy much less ‘visual space’ in the room – ideal for open plan en-suite interiors.

(Twin, Pluro and Barwon)

The Clearwater range also includes a variety of models which feature an under bath plumbing cavity. This allows for easy installation, and re-positioning the bath to the perfect final position.

(Patinato, Byron, Sontuoso, Pluro with Plinth and Canal)

BYRON BATH

A popular bath with clean simple lines that create a shapely aesthetic. Its organic form will be the perfect compliment to any bathroom. Available in both gloss and matt finishes. Matching basin also available.
