INSPIRATION ENRICHES LIFE

Pursuing

Beautiful Future

2400

To know one's taste, just visit his/her bathroom. Throughout the day, it is where you refresh yourself, and is also where you can truly relax. For individuals who reward themselves with pleasure and enjoyment in life, how would it be possible for them to neglect such an important place?

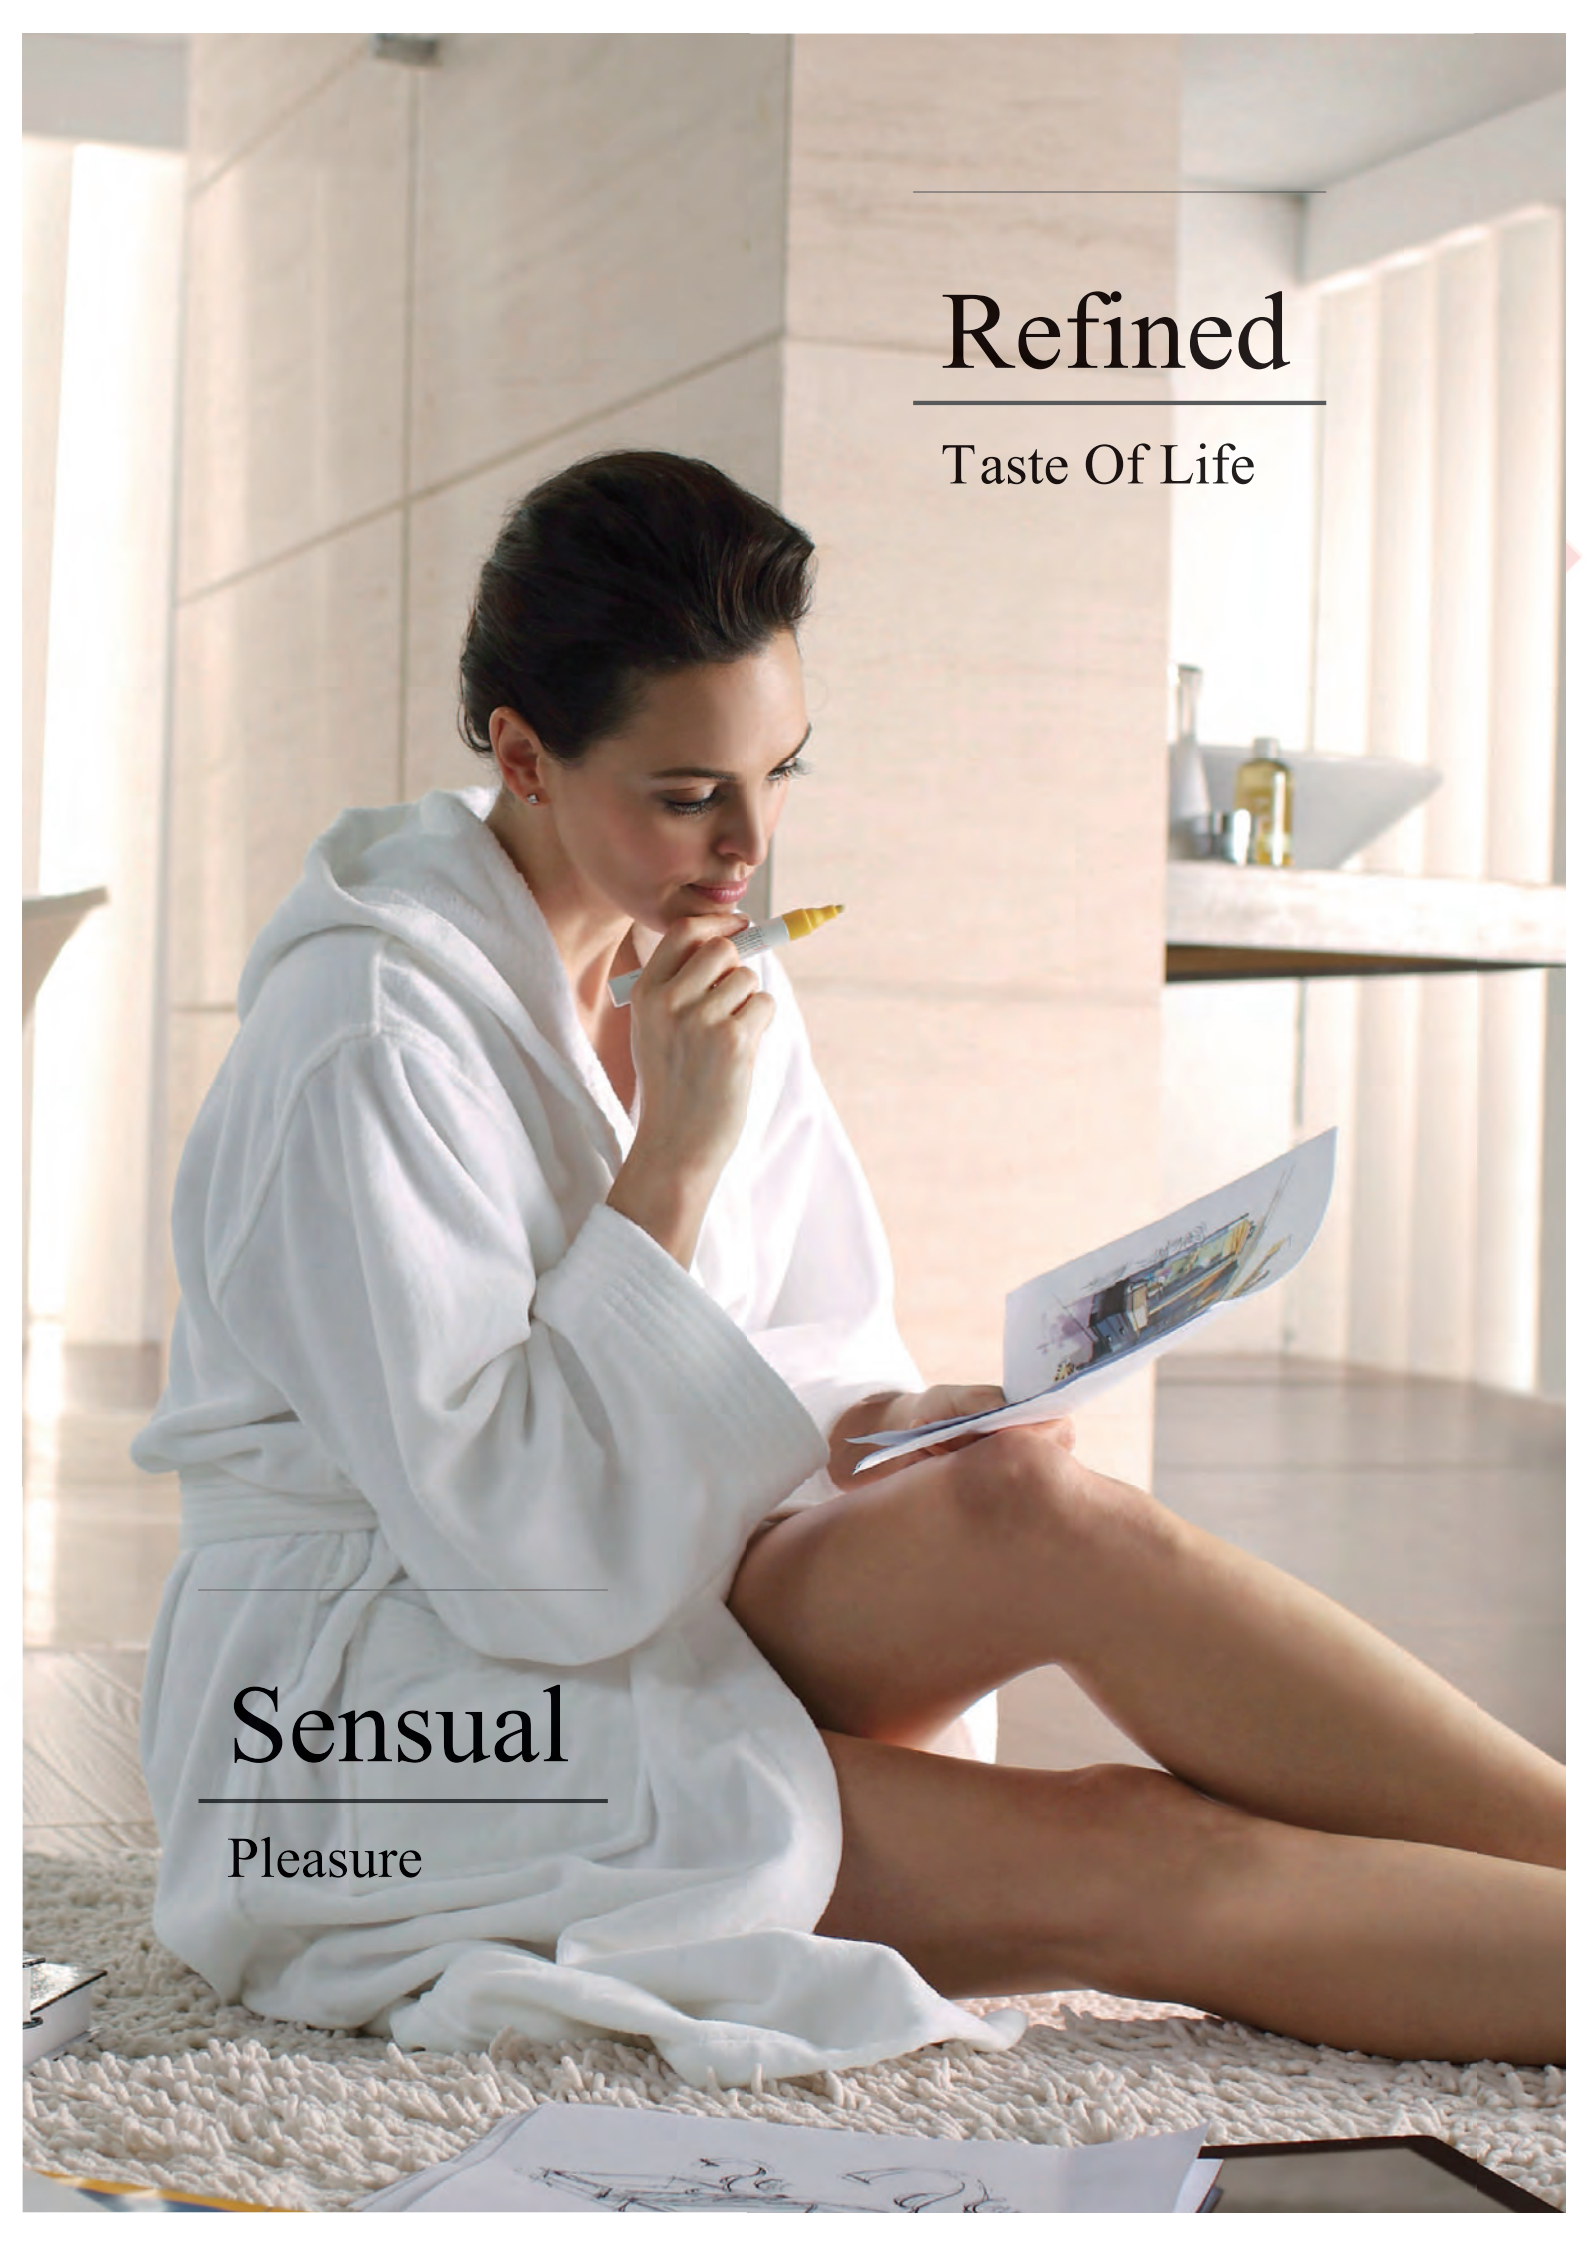

As a brand that aims to provide a life with enjoyment and grace, Bravat dedicates itself for those who prioritise the pleasure in life.

Enjoy your life and pursue a lifestyle with taste. Luxurious, mysterious, stylish, or even futuristic... Whatever it is, you are guaranteed to find the one you like from the various suites that Bravat has to offer.

Enjoy your life and pursue your own pleasure. With 142-year glorious history of striving for perfection, Bravat is confident in providing you a bathing experience beyond compare.

Enjoy your life and pursue a greener future. Those who enjoy a tasteful way of life can also be the ones who care for the environment. With our energy-efficient, water-saving and lead-free products, Bravat provides you an eco-friendly solution.

You know your life and Bravat knows you. Enjoy your life with Bravat!

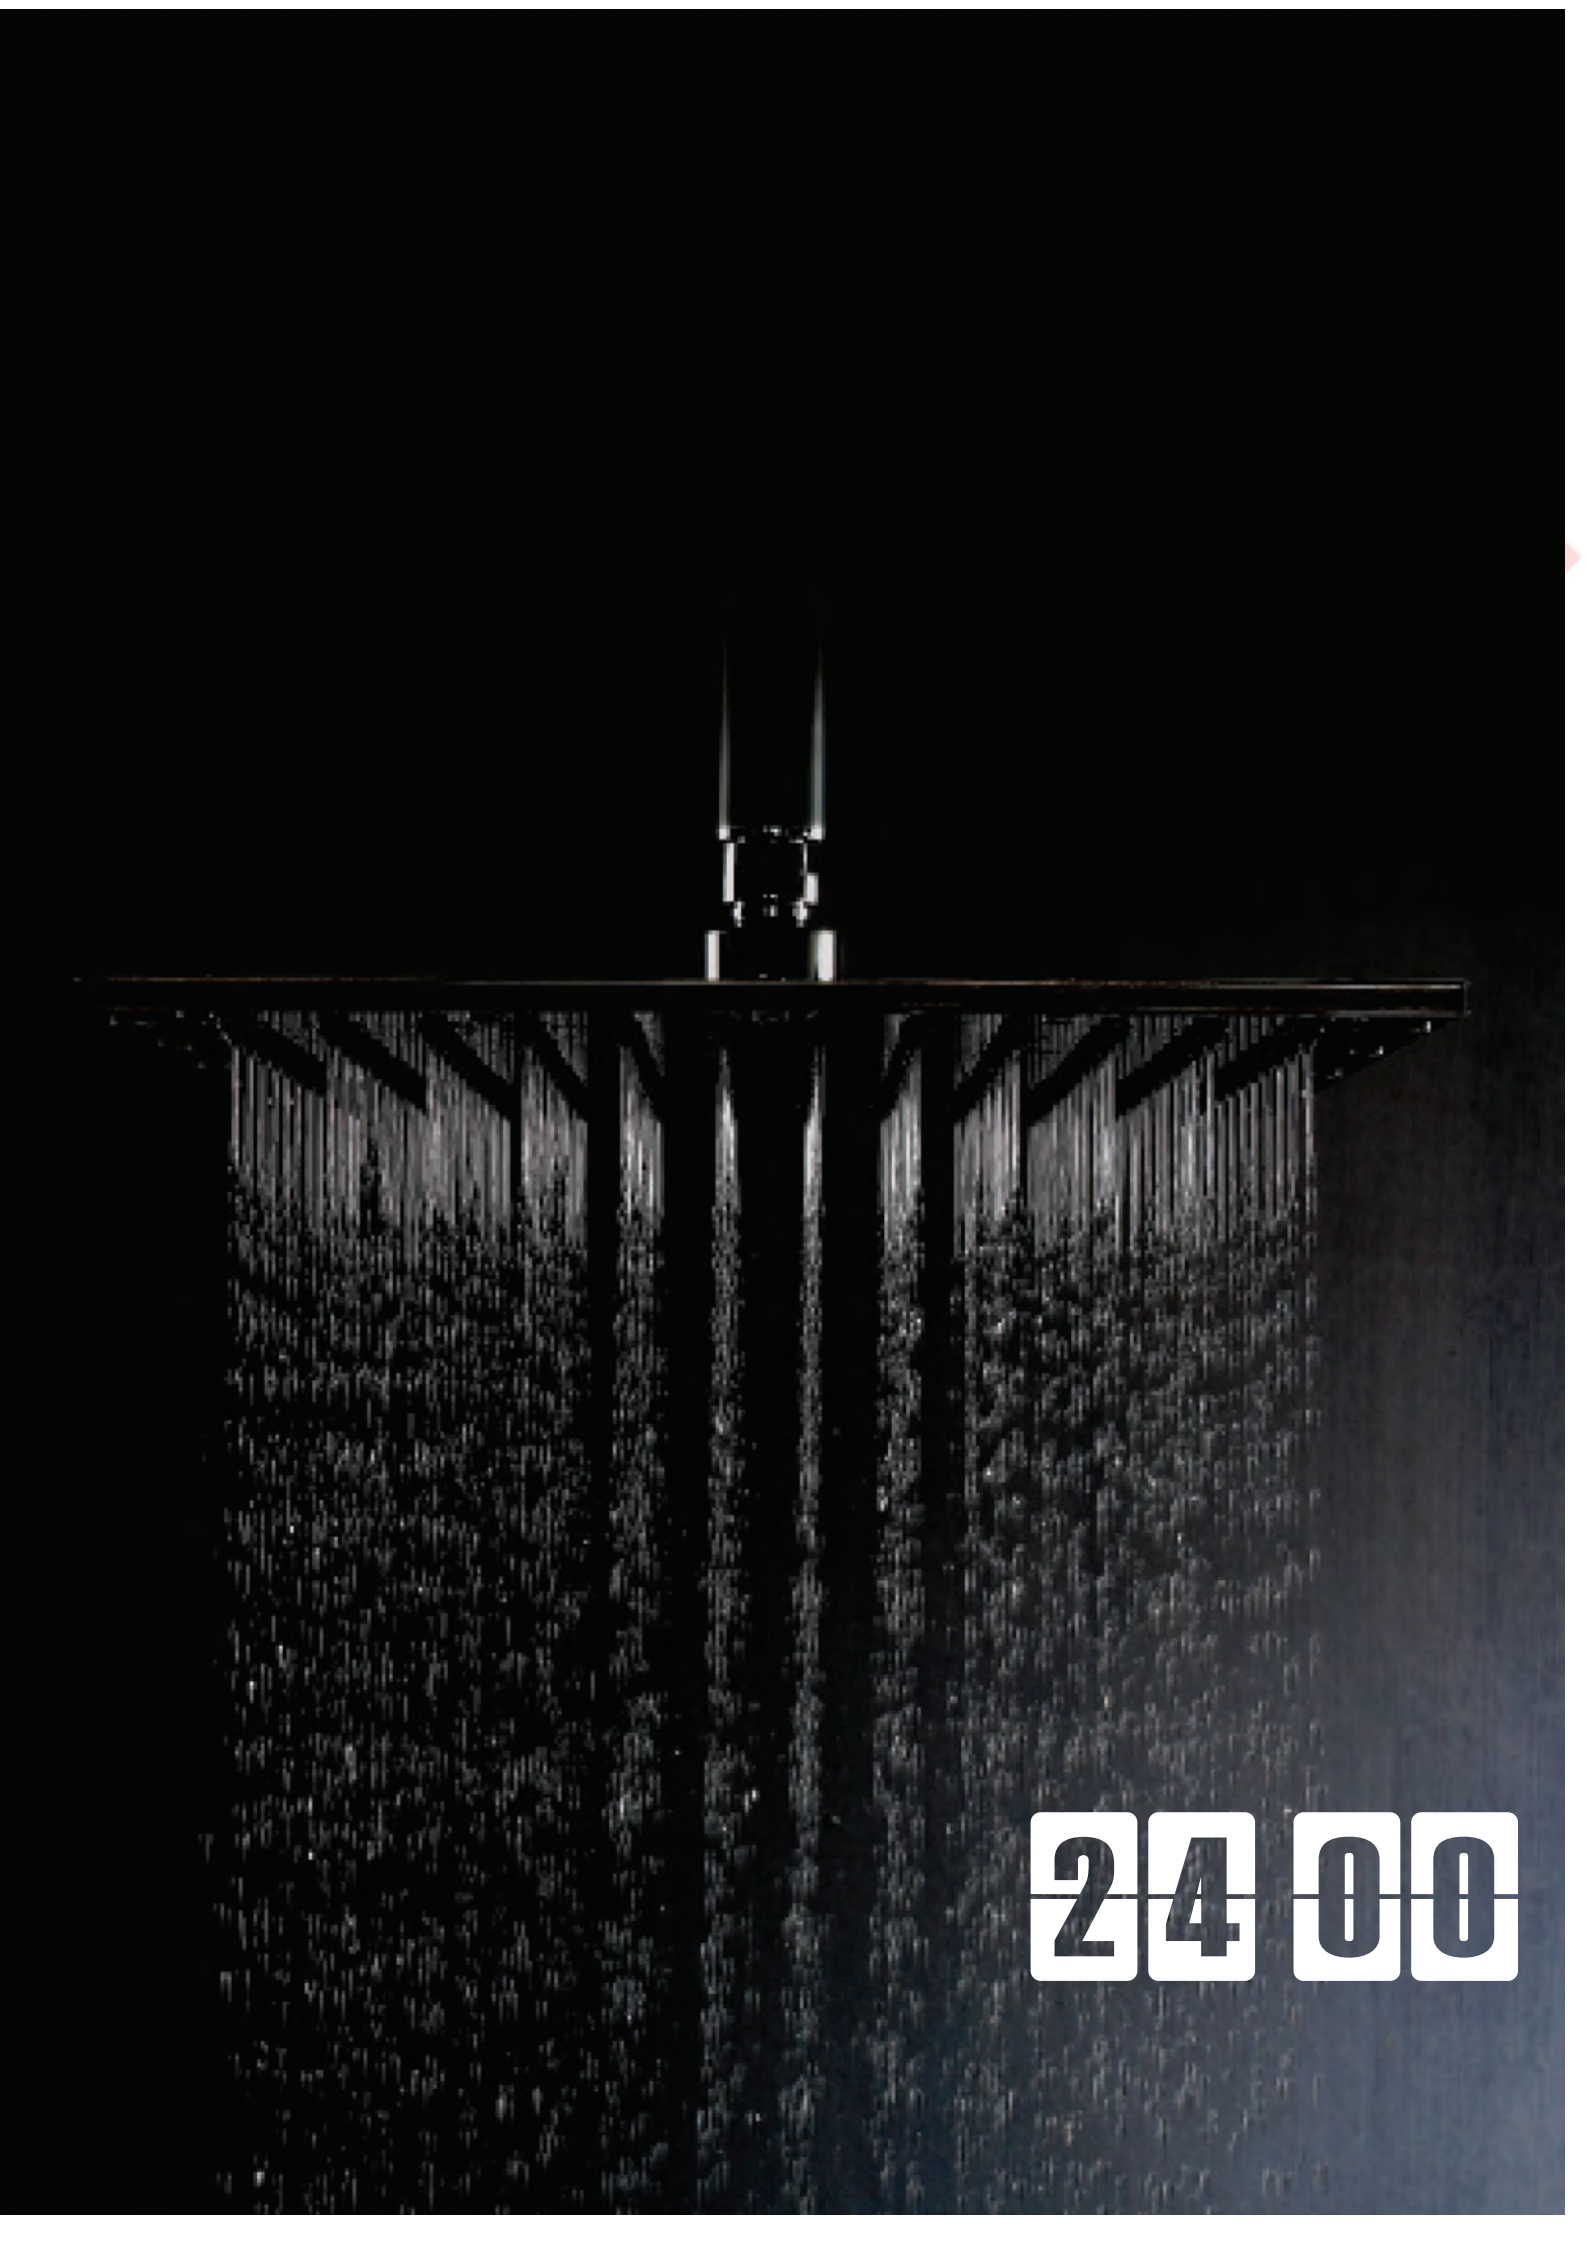

A woman with dark hair pulled back, wearing a white bathrobe, is sitting on a white shaggy rug. She is holding a yellow marker in her right hand and looking down at a drawing of a house on a piece of paper. The background is a modern interior with large windows and a white wall.

BRAVAT GLOBAL PROJECT REFERENCE

An aerial night photograph of The Yas Hotel in Abu Dhabi. The hotel's architecture is highly futuristic, featuring a long, curved structure with a roof made of thousands of illuminated, diamond-shaped panels. The left side of the roof is lit with warm red and orange lights, while the right side is lit with cool blue lights. The hotel is situated next to a dark, winding F1 track, which is also illuminated with blue lights. In the foreground, there are landscaped areas with palm trees and modern lighting. The overall scene is a vibrant display of modern architecture and urban design.

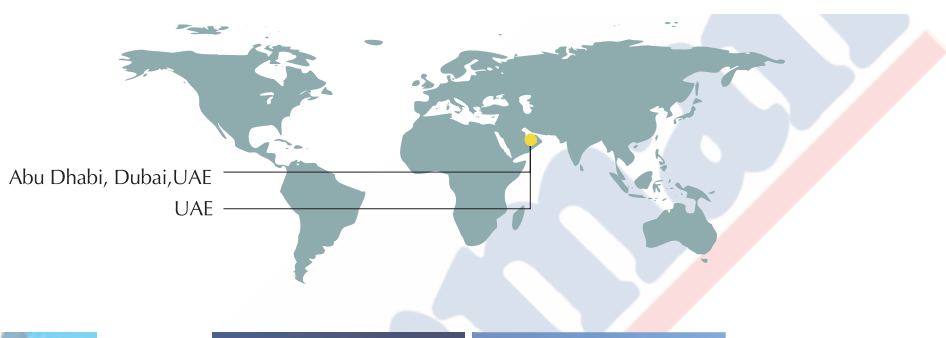

The Yas Hotel - Abu Dhabi

Abu Dhabi , UAE

With a design inspired by the ergonomics and speed line of high performance cars and yachts, Abu Dhabi is the first hotel to ever be built across a F1 track, where every detail reflects the unique character and passion.

WELL-DESIGNED WELL-MADE

Materials for this faucet are chosen abiding by the strictest lead-free standard, which is measured by micrograms.

We pay special attention to healthy water use, as water from the tap directly contacts your skin. High quality brass has bactericidal effect, and this is why we choose it as the base material for our faucets.

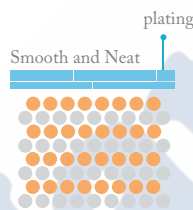

Thanks to the advanced lead-free technology, Bravat is always ready to challenge various tests and standards, including the international standard GB 18145-2014, NSF 61(for the U.S.A) , EN817(for Europe) and AS/NZS 4020.

● Analysis on Brass Purity

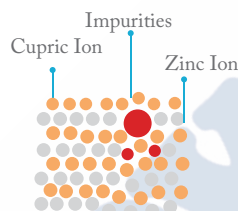

Refined High Purity Brass by Bravat

With nearly no impurities, the metal atoms are able to form a tight and solid structure.

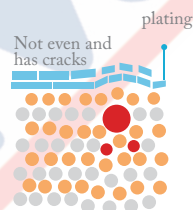

The Result of Electroplating depends on the purity of Brass

High purity and tight structure can effectively help prevent leaking and corrosion.

Average Brass containing Impurities

With large amounts of impurities, the metal atoms structure is irregular and loose.

Cladding layers containing impurities has weak adhesion

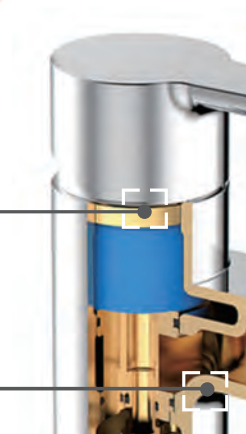

Impurities are likely to cause rusting and cracking

<0.005mg/L
Lead Content in
Drinking Water

3 mm Wall
Thickness of
the Brass Body

Brass
Purity

Brass
Thickness

Bravat insists on using super brass with the highest purity for its faucets.

High purity not only means extremely low impurity content, but also a stable structure of metal atomic. A strong and powerful structure is the key to corrosion resistance, which can effectively avoid leaking caused by corrosion meanwhile improve adhesion.

The brass body sustaining the water pressure is thicker than 3 mm, which is evenly made and has a high density and stronger pressure resistance.

A Promise of lifetime warranty ensures your benefits forever

A best after-service, Lifetime Warranty, is offered by Bravat.

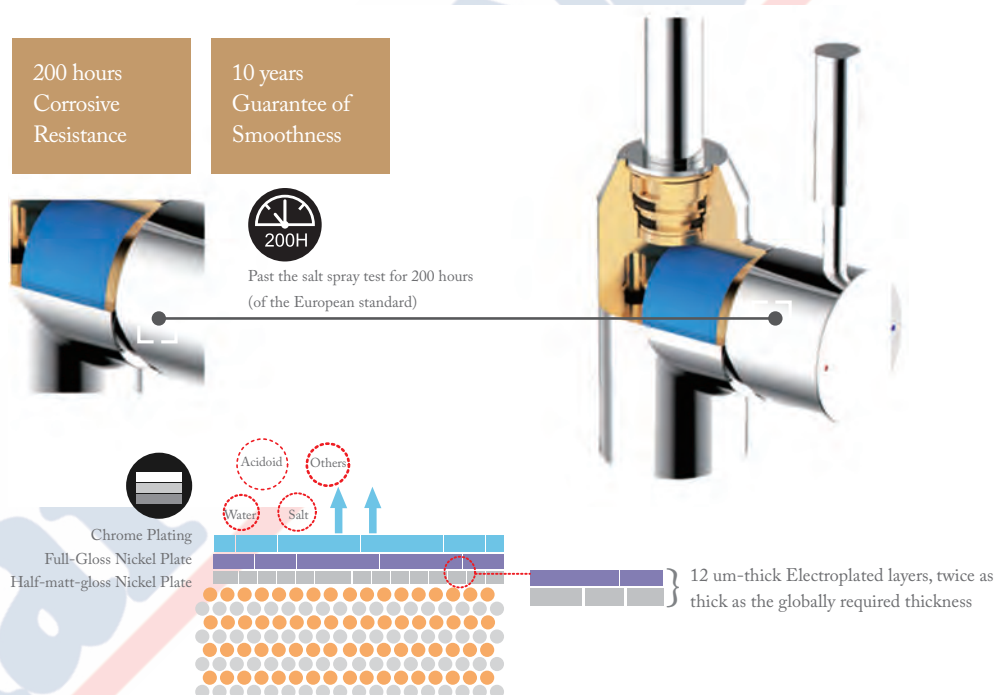

The users will be gotten covered as long as they use Bravat products, because we want every user to enjoy the best way of bathing possible. *Refer to Terms & Conditions .

The secret behind a shiny faucet is the most excellent speculum plating technique

Time goes by but it leaves no trace on Bravat faucets. Even for faucets that have been used for a long time, it only takes a quick wipe for the surface to regain a brand new look.

The outside of the chromium layer is smooth and evenly chromed, whilst its inside is anti-corrosive.

It takes a top-grade three-layer electrochromism technique to make sure of its high-quality from the inside out.

- Thanks to the top-quality base material brass, the faucet only needs three layers of electroplation.
- The exterior layer of the chrome plating is solid and shiny, preventing the faucet from leaving scratch marks easily.

WELL-DESIGNED WELL-MADE

A cartridge that stands the test of time:
does not leak even after 800,000 times of opening

One principle on how to tell a good faucet:
when you turn the switch on, it feels smooth and non-blocking. Its smoothness and accurate positioning determine if it is a good cartridge. A cartridge to a faucet is what a heart is to a man, since it determines the life span of the faucet.
Bravat faucets are equipped with imported cartridges with original packaging, such as Kerox from Hungary, Fluesh from Germany, and Vernet from France, which are leakproof and durable.

Water-saving

An aerater makes both comforts and water-saving come true

This tiny piece of accessory hidden in the spout actually has many practical functions:
Preventing water from splashing、 improving comfortable sensation controlling the water volume、 water filtering、 noise reduction、 water saving.

Bravat uses NEOPERL® aeraters originally imported from Switzerland for its faucets.
The cross section of the aerater is structured like a honey comb, which mixes in 30% air into the water, gaining momentum for the water flow. Whilst creating bubbly water flow gentler to the hands, it also saves 30% water usually used.
