

DE8060P2

8 kg Condensing Dryer

This extra large capacity dryer makes a perfect pair with the WashSmart™ Front Loader. Its condensing technology makes installation simply a matter of plugging it in. No venting is required. Its 8 kg capacity means clothes can move around freely to ensure even drying and minimise creasing.

Features & Benefits

Drying Rack

Some things are just too precious to tumble. All Condensing Dryers and 6 kg vented models come with a drying rack, perfect for shoes, hats woollens and delicates.

Healthier Drying

Our 8 kg Condensing dryer is perfect for doing the laundry quickly and efficiently. The condensing technology means water is condensed and either drained from the dryer or collected into a tank. This reduces the amount of moisture and allergens released into your laundry compared to a front venting dryer. A healthier choice for asthma sufferers.

Auto-sensing

Auto-sensing automatically senses the moisture inside the drum, shutting off at the perfect level so your clothes don't over dry, helping your clothes last longer.
