*Running costs based on \$0.25/kWh. Heating area is for a protected outdoor site.

MATERIALS OF CONSTRUCTION: Heater: High temp ceramic coated extruded alloy. IP55 Rated. Stand: E-coated mild steel with powder coat finish.

For spot heating applications only. Please locate the heater as close as possible to the desired area.

BLISS™ Portable LPG Outdoor Heater

With elegant styling, world class design and performance, the BLISS Portable LPG Outdoor Heater model BRGH-PORT is the perfect solution for heating your outdoor entertaining area, alfresco, patio or balcony.

FEATURES

- 34 MJ (9.4 kW), 4 tile ceramic gas burner for use with a standard 9kg LPG bottle (gas bottle not included)
- Easy to operate manual integrated Piezo ignition. Safety features include tilt safety switch and flame failure device
- A high/low heat option to control heating output. The directional heat performance allows you to focus the heat only on the areas you are using. Built-in wheels for easy portability
- A stylish protective grille and reflector is included as standard, to ensure safe operation. Reflector design ensures that only a minimum of 500mm overhead clearance is required
- Components are factory sub-assembled for easy final DIY installation. Fully hidden gas pipes and bottle
- 2 year residential and 1 year commercial warranty
- Suitable for outdoor use only

MODEL	TILES	MJ	IGNITION	DIMENSIONS (WxDxH)mm	RUNNING COST* (p/hr)	WEIGHT (kgs)	HEATING AREA (sqm)
BRGH-PORT	4	34	Manual, Piezo	650x670x2118	\$1.60 on high \$1.12 on low	31.5	16

*Based on \$20 per gas bottle refill and run time of 12.5 hrs on high / 18 hrs on low

MATERIALS OF CONSTRUCTION: E-coated mild steel with powder coat finish. Grille & reflector with extra high temperature protection.

BLISS™ Wall Mounted Natural Gas Heater

For when a permanently wall mounted Natural Gas (NG) solution is preferred, model BRGH-NG brings the comfort and style you expect indoors, to your outdoor entertaining area.

FEATURES

- High output, 34MJ (9.4 kW), 4 tile commercial ceramic burner, for connection to mains Natural Gas (NG)
- Electronic battery ignition with micro-switch On/Off operation and stainless steel pull cords. No additional electrical connection is required, saving on installation costs.
- A stylish protective grille and reflector is included as standard, to ensure safe operation. Reflector design ensures that only a minimum of 500mm overhead clearance is required. Optional reflector is available for low clearance (300mm) applications
- A robust wall mounting bracket provides for multiple mounting angles.
- 2 year residential and 1 year commercial warranty.
- Minimum recommended mounting height is 2m with 1m side clearance.
- Suitable for outdoor use only in a residential application. Can be used indoor in a non-residential situation (minimum volume of 170m3 is required). Must be installed by licensed gas-fitter.

MODEL	TILES	MJ	IGNITION	DIMENSIONS (WxDxH)mm	RUNNING COST	WEIGHT (kg)	HEATING AREA (sqm)
BRGH-NG	4	34	Electronic Battery	650x190x380	\$0.68/hr (based on a 24/MJ)	11.5	16

MATERIALS OF CONSTRUCTION: E-coated mild steel with powder coat finish. Grille & reflector with extra high temperature protection.
